FUTURE RAILWAY TENDENCIES.

The mushroom-like growth achieved by the steam railroads since their inception will probably not be carried into the near future. During the early life of the roads it required much effort to keep abreast of the demands made upon them by the rapid development of the country. This caused very hasty construction, which led to much more building in some localities than the traffic warranted; and, as is often the case when quantity is the object sought, great deficiency in quality resulted. Much attention has been given in many cases to methods of improvement and more attention must be given in that direction in the future. It would add to the usefulness of our State Railroad Commissions if they were required to compel new roads to adopt a higher standard in building.

One of the fundamental requirements for a superior railroad is that the roadbed shall be firm, well drained and comparatively dustless. It is only under these conditions that a track can be obtained that shall offer the least possible resistance to traction and shall secure the greatest comfort for the passengers. The convenience of the patrons will also be increased when some suitable form of motive power shall be obtained which shall be free from the unpleasant features incident to the coal-burning locomotive. With a comparatively perfect roadbed faster time will be possible. The attempts to increase speed will require the formation of trains in such shape that they will offer the least resistance to the air. It will be necessary to improve the alignment of many roads and to abolish grade crossings.

There is another tendency which will probably exert a very marked influence in future railway management. More and more young men with a scientific or administrative training will be taken into subordinate positions by railroad companies, and advanced step by step. When they have reached positions of authority they will have that most valuable of combinations, a thorough technical training amplified by practical contact with their work. This policy, which is being adopted by many companies, in their dealings with trainmen, and the tendency to aid during their declining years those who have served long and faithfully, will greatly increase the efficiency of the employes.

As to construction, future railroad projects will look rather to the establishment of feeders than to the building of trunk lines. A railroad President, Mr. James J. Hill, says: "The forces likely to determine in future the construction of new lines of railway in the United States are the need for better terminal facilities and the special requirements of particular sections. That the building of great trunk lines has come to an end is shown, I think, by the fact that during the past dozen years there has been a steady decline in railway construction in all parts of the United States. A railway that will not yield a prospective profit to its projectors has no legitimate reason for existence, and, as the existing lines between the West and the East are prepared to transport twice or thrice the tonnage now offering, or likely to offer for many years to come, to attempt to parallel them with new ones would be a financial blunder little better than a crime. The competition of older rivals and the consequent division of business would render the stocks and bonds of the new comers practically useless, and investors have learned caution from the disasters of the past. Lines now in operation are pretty sure to seek improved outlets, and there is bound to be a small but steady increase in mileage, having for its object the development of some particular interest or section; but more than that should not be looked for in the near future. Indeed, in most of the States of the East and Middle West, the existing mileage supplies all the facilities wanted. In such States no considerable amount of new mileage can be built with the assurance of profit, and this fact will exert a salutary influence in checking doubtful ventures and compelling obedience to the very excellent rule that where a line is capable of handling the transportation of its section, the construction of a second should not be undertaken. Capital seeking investment will be mainly directed in future to the development of urban and interurban electric railroads, a department of transportation which is still in its infancy."

COMPRESSED AIR IN TRACK WORK.

While labor saving, power-driven tools have been adapted to nearly all kinds of work, track work has not received due attention. There is, of course, reason for the existing conditions. The work required for track maintenance is scattered over long distances and often occurs in small amounts at numerous places. There are, nevertheless, many opportunities for the application of power-driven machinery to the repairing of old track and remarkedly so to the construction of new track. The use of such a system would probably modify the existing methods in track maintenance. The power-tool crew would be able to cover a section of greater length than is now common, and it would be found advantageous to reserve, in so far as practicable, all repairs at one locality to be done at one time.

The power which at the present time appears to be best adapted for use in such purposes is compressed air. As to the method of distributing the power, Mr. W. L. Derr writes in the "Railroad Gazette" suggesting one way, as follows: "For distributing power a line of three-inch pipe several hundred feet long, laid on the surface of the roadbed outside the rails, with storage reservoirs for keeping a supply of air, and a gasoline engine-driven compressor, would serve the purpose. The compressor, engine and reservoir to be placed on a hand-car to add to the portability and the air main to have detachable joints every few lengths, so as to be easily moved to a new location; tools to be connected with the power main by flexible tubing and air-brake hose connections."

Of the many implements which would be of material assistance in track work the following may be mentioned: A track jack to be operated by air should not be difficult of construction and should prove a very efficient instrument which would become invaluable where track work is being carried on. This instrument could be used to great advantage in track raising. For lining up track it could be used as a ram—the base being placed at one side of the kink to be taken from the track. If necessary a bar could be fixed in the earth behind the base of the jack to give a more solid support. For tamping ties an instrument could be designed similar to an air hammer, which would tamp the ties very fast and in a satisfactory manner. An air motor, similar to an air drill, could be used to quickly screw up or unscrew the nuts on track bolts. To drill holes in wood or in rails for bond wires or other purposes an air drill would render the operations much less tedious. An air spike-driving tool can be designed which would force the spike into the wood with less tearing than in the ordinary method, so that less damage would be done to the tie and a more secure fastening of the rail obtained. For riveting, chipping and calking in steel work the power tool is extremely important.

Mr. W. H. Finley, Principal Assistant Engineer of the Chicago & North Western Railroad, has designed and equipped a pneumatic tool car for use on that railroad. The contents of the car are as follows: one Otto gasoline engine, one horizontal Ingersoll-Sergeant air compressor, one air tank, two cooling tanks, and one gasoline tank, all of which is mounted on a flat car. There are also about 600 feet of hose and piping, which can be so connected to the air tank that three sets of tools can be used at one time. When necessary, the machinery can be removed from the car and located as desired. This tool car is of great value in repairing old bridges and in the erection of new bridges. The engine and air compressor are controlled automatically, so that the plant requires no particular attention other than that needed to keep it well lubricated.

The laying and maintenance of track are very expensive, and anything which lessens that cost is a desirable acquisition. Methods, too, capable of accomplishing the work with a minimum interruption to traffic would be welcomed by all engaged on railroad improvement. There is in the foregoing suggestions a most fruitful field open to those of an inventive frame of mind to devise the best means for distributing power and to supply the power-driven tools required in track work to place it abreast of other commercial operations.

THE APPLICATIONS OF ELECTRICITY TO RAILWAY OPERATIONS.

The proficiency which has been reached by the railroads in controlling the movements of trains and providing for the comfort of passengers is due to a considerable extent to the applications of electricity which have been made on the railroads. It is reasonable to expect that more careful study of existing needs will result in greater improvements along these lines by an increased use of the now tried appliances and also the adaptation of electricity to new purposes.

One so acquires the habit of accepting that which is common as a matter of course, especially in this age of rapid improvement and invention, that he is apt not to think to what is due the successful accomplishment of the different results. This is particularly so in the case of the patrons of railroads. Yet, when one reflects, it seems almost marvelous that so many trains can be moved so rapidly with so little friction, so few accidents, and so little discomfort to its patrons. When the coal-burning locomotive shall be replaced with some motive power which shall be free from smoke and cinders, traveling will be relieved of much annoyance.

Were we to follow a steam railroad train on its journey with eyes open to discover the applications made of electricity, our search would be rewarded at the very outset. In order that the train may cross from its position in the train-shed at the terminal station to the outgoing track, electricity is called into play in moving the switches, setting the signals giving the train right of way, and thereafter in working the block system to protect the train during its run. Becoming tired, the electric bell is rung to summon the porter that he may prepare the berth. If one is so unfortunate as to be obliged to occupy an upper berth near a light—the car being lighted by oil or gas—he is forced to think how much less hot the car would be with electric lights. As one meditates on the subject, he wonders why electricity is not more largely used for lighting trains, since there is so much to commend it. If an accident should occur with a car having oil or gas lighting systems, the naked flame incident to the system might cause fire, or a collision might cause an explosion of the gas in the tanks, producing the same result, and thus cause loss of life. The electric lights give little heat, can be made as intense as desired, can be placed at will, and require no provision for the removal of the products of combustion. The Ministerial Councillor and Director of the rolling stock and locomotives of the

Hungarian State railways, Cajetan Banovitis, recently said: "Of all the modes of lighting trains, that which seems to us to best answer to the conditions of a perfect light is electric lighting, for, besides offering the greatest security against the danger of fire, it possesses a proper luminous intensity, assures a light, clean, fixed, exempt from atmospheric influences, and permits a simple and economical dimming for the night.

Everything, in short, invites to the belief that from the pecuniary point of view this method of lighting will permit more favorable economical results than have hitherto been attained; and it may pertinently be remarked that the advantages which other methods of lighting may appear to present over the electric lighting are largely offset by the superiority of safety conditions and by the other inherent advantages of the method." The United States is far behind some of the European countries in the adaptation of electricity to railway train lighting. Austria has made much progress in this direction; on the Swedish and Danish lines electric lights are the rule rather than the exception; Switzerland has given much attention to the subject, and in Germany there are about 8,000 railway carriages equipped for electric lighting. Since 1893 this form of lighting has been employed in the postal cars of the State railways in Germany until it has become all but universal. It has been recommended for the postal cars in this country. Objection is made that when the current is furnished by a dynamo which is driven by the car axle during the run of the train that the varying speed and stoppage of trains causes an unsteadiness in the light which the accumulator does not always correct. Such being the case, effort should be made to correct the evil. With efficiency, economy and safety credited to the electric lighting of trains, the system should be extended. As one leaves the train he can step to the telegraph office for information in relation to the whereabouts of connecting trains.

In the switching and transfer yards now being built by the Chicago Transfer & Clearing Company, there will be four separate parallel yards, each operated by gravity switching from a "camel-back" having grades of nine-tenths of one per cent in both directions from the summit. Switching movements will all be controlled by the Westinghouse pneumatic-electric interlocking system of the Union Switch & Signal Company, the signals and switches being operated from a tower at the summit. The yards are to be lighted by arc lamps on poles placed on each side of the "camel-back," and a searchlight at the signal tower will make it possible to light any particular spot.

In electric railway construction and equipment, great progress has been made and much efficient apparatus has been designed. There are the electric brake, the electric heater, the lights, signals and similar devices. Several problems, however, have not yet been satisfactorily solved. One of the most important is to secure a desirable method by which to transfer the current from the generator to the car motor. This subject still furnishes a theme for the inventor's ingenuity.

Railroad companies are constantly seeking to secure greater comfort and safety for the patrons of their roads, and to increase the efficiency of the service. Further effort and progress along these lines will no doubt be made in the near future by adopting any electric devices the usefulness of which can be established.

THE TRAMP NUISANCE.

The nuisance caused by tramps to railroads and to the cities and towns on the routes of the main lines has long since reached a condition where rigorous and methodical action needs to be more generally undertaken. In a few cases this has been realized and plans formulated to eradicate the nuisance.

The great army of individuals that spends its time in traveling from one section of the country to another, subsisting by food which it is able to beg or permanently borrow, furnishes a serious menace to the country at large, and a very troublesome and expensive burden to that section of the country in which its members are sojourning at that particular time. The very fact that they are ever on the move from one place to another removes from them the thought of moral and statutory responsibility. When one feels that his actions fall under the observations of those only by whom he is not known, and will probably never be seen again, the balance wheel is removed and the governor is liable to run wild. Therefore, for social security and stability, it is expedient that the great mass of humanity should have a somewhat fixed abode, where the light of public opinion and criticism may be focused on their actions and the moral and social requirements upon the individual may be enforced.

To correct an evil investigation must be made to ascertain the causes which germinate and foster the evil. Then the axe of correction can be directed at the base of the evil, and the very rootlets can be destroyed. The fundamental characteristic of the professional tramp is laziness, and it is by applying every possible device which is repugnant to laziness that the tramp nuisance can be satisfactorily attacked. At a conference held in Philadelphia by many of the leading men in Pennsylvania, for the purpose of starting a crusade to abolish the wandering class and banish its members from the State, various methods were suggested. It was proposed to send the tramps to jail and keep them on bread and water; to administer chastisement with the aid of the horsewhip; to force them to meditate on the evils of laziness while abstaining from the use of food; or to give such severe punishment that they would thereafter not afflict the State with their presence. Others favored what would seem to be the best solution of the problem—they would establish wood-yards and stone piles at which the tramps should be set to work sawing and splitting the wood and breaking the stone. Many States are expending much money on highway improvements, and the wandering gentry could be employed for a stated period upon such work. By these methods the tramps of misfortune could be separated from the tramps of laziness. Then the former class could be aided and set on foot again, while the latter could be expelled and in time nearly eradicated. If each community would set up a "wayfarers' lodge" where "work" was the watchword and "yet more work" was the passport, then would those communities be strictly avoided by that class of individuals who regard work as a thing to be strictly avoided.

The railways should also assist in the extermination of this parasitic class. The great number of tramps is due in a large degree to the ease with which they can move from place to place by the aid of freight trains. In this manner, like locusts, they can pester a certain region until its value as a foraging ground

has been for the time exhausted and then jump on to a freight train for a new locality where they can repeat the process. On one railroad which has come under the writer's notice, the railroad instead of aiding in combating the tramp nuisance has done the reverse. A building used by the railroad for storage batteries has for some time been the lodging house for tramps, so that there is rarely a night in cold weather that its sleeping accommodations are not fully utilized. Indeed the trainmen, realizing the attitude of the railway officials, rarely or never molest the tramps—are in fact afraid to do so.

By the combined efforts of the railroad companies and the municipalities much progress should be made in the extermination of the tramp nuisance. The railroad companies can prevent the easy change of locality. Long-continued walking is not to the liking of the professional tramp—it is work. The municipality can keep ready the wood and stone piles, the highway improvement, etc. That would not be to the tramp's taste—it is work. With work staring him everywhere in the face, the tramp's life will no longer be attractive to him, and that troublesome class of individuals will be reduced to a minimum.

THE USE OF CALCULATING MACHINES.

The push and bustle of the present age cause a drain on human strength and endurance which makes it mandatory that every practicable device possible shall be instituted to relieve the drudgery and hasten the performance of human processes.

The increase in intensity of action is forcibly illustrated in the suburban traffic of many a city, and notably so in a staid, conservative New England city. There, in its infancy, the winding cow-path furnished ample room for the horse and his rider. Soon, however, the path had to be expanded to a wagon road. After a time many living at some distance from the business center wished to travel back and forth without incurring the expense of a separate team. The solution of this problem came in the shape of barges, and, later, horse-cars. But horse-cars are slow and limited as to loads; especially is their inefficiency noticeable on grades and in the hot days of summer, when all wish to ride. Therefore the horse had to give way to electricity, and the hurrying crowd felt that its needs were settled. Was such the case? No! Soon it was observed that traffic was congested in the down-town streets so that the electric cars could make scarcely better time than the horse cars had previously made. Consequently something must be done and a subway was tunneled into the earth that the cars might forsake at least one street for it. That partially solved the problem, but still too slow time was made. And again the engineer stepped in to relieve the situation. This time he came forward with an elevated road. Now the patrons flock into or out of the cars with the greatest rush possible, the gong sounds, and the gates to the cars bang. Fortunate is he who is not caught in their grip. Thus, as the cars thunder along on the surface, in the earth below, and the heavens above—beside, under and over one—it causes reflection on the strenuous life of the present, and wonderment as to what is to be the outcome of it all.

Much effort has been made to expedite the move ment of material things, but very inadequate attention has been paid to shortening and simplifying the operations demanding mental exertion. And it is to this end that great study and effort should be devoted because it is the mental hurry and strain which is the most wearing and serious. Several reasons exist why this condition obtains. In the first place certain methods have become traditional; are handed by one generation to the next which becomes associated with it. Second, sufficient effort is not made to become familiar with new methods or mechanical devices and to ascertain their adaptability and accuracy. Thus from force of habit and lack of confidence in the new methods one age succeeds another, performing the operations after the same manner.

This is particularly true as to the use of calculating machines. To be sure, in larger offices many ingenious and helpful devices are met, but even there much improvement might often be made. The ordinary business employes, contractors, assessors, engineers, etc., have ample occasion for the use of these time and labor saving appliances. There is one instrument in particular which is adapted to quite general use—the Mannheim 10 inch slide rule. By the aid of this rule multiplication and division can be very quickly performed, giving a result in error less than three-tenths of one per cent. In ordinary computations the result can be found within one-tenth of one per cent. Every one who has computations in which no greater accuracy than the foregoing is required should own and *use* a slide rule. Little time is required to think of a host of such problems: Moments of beams, stresses in all classes of structures, weights for estimate, areas in many surveys, reductions in stadia work, computation of earthwork, machine design, contents of scows in dredging, hydraulics, studies relative to the purification of water and sewage, percentages, proportioning of taxes, many computations in department stores and business firms—in fact, for all preliminary and very many final estimates. If one who has never used the slide rule will spend a little time working out simple problems under the direction of some one who is familiar with the use of the rule, or in conjunction with a clear treatise on the method of using the same, he will be surprised at the speed and accuracy which he can attain in computations. If one wishes more nearly accurate results, there is the twenty inch slide rule and the Thatcher calculating machine—a circular slide rule of very great length. In the case of one corporation, computations on accounts were performed with a Thatcher machine, "doing in three or four days what had usually taken three weeks."

When an instrument is desired which will give a large number of places in the result, the Brunsviga machine is available. There are also adders, comptometers and similar instruments which are being used to some extent in commercial houses, and are reported by the users to be very satisfactory. For use in selecting steel I-beams, Mr. James S. Merritt, of Merritt & Co., Philadelphia, has devised a very efficient and convenient slide rule.

Thus there are many instruments at the calculators' disposal, and more might be devised by those interested, to lighten the drudgery and weariness of many-times repeated laborious computations and calculations. If those having the work in hand will give the matter suitable consideration and select the aids adapted to their work, the demands made by this quickstep age will be very much less severe.

No other mortgage and no increase in the preferred stock can be made without the consent of a majority of all the preferred stock and of all common stock represented at a meeting. The total authorized amount of preferred stock is $131,486,000, of which $10,800,000 is reserved to acquire other lines; also $6,846,470 in special trust for improvements, extensions, etc. Pref. stock certificates in SUPPLEMENT of April, 1897, page 3. Y. as trustee, and gives a lien, either by direct mortgage or by collateral trust, on the entire system of 7,371 miles of railroad owned, together with all the equipment and terminals owned by the company, and future acquisitions.

General mort. bonds can never exceed $165,490,500, including $96,990,500 issued in reorganization and remainder issuable as follows:

The *Adjustment Mortgage* (**Abstract** V. 62, p. 739) is to the Central Trust Co. as trustee. Interest is payable only out of net earnings for the fiscal year up to 4 per cent and the rate is to be determined on or before October 15 in each year; interest was non-cumulative till July 1, 1900, and cumulative thereafter. Present issue is limited to $51,728,000, but when the $30,000,000 general 4s authorized for improvements as above have been issued (i. e., not before June 30, 1905), $20,000,000 additional adjustment 4s may be issued for the same purposes at not exceeding $2,000,000 in any one year, but only by a majority vote of the adjustment bondholders. *Interest*—In Nov., 1897, paid 3 p. c.; since, full 4 p. c. yearly.

San Francisco & San Joaquin bonds may be drawn at 110.

GENERAL FINANCES.—The guarantee fund notes due Nov., 1898, were retired by issue of $10,596,000 general 4s, thereby obviating the necessity of issuing prior lien bonds. ORGANIZATION, CONTRACTS, ETC.—The Company was chartered in Canada February 28, 1868, and debt readjusted in 1878. In Nov., 1882, a close contract was made with the Michigan Central for 21 years from Jan. 1, 1883, providing for payment to Canada South'n of one-third joint income over fixed charges. Under re-apportionment of December, 1892, it was agreed to give the Canada Southern 40 per cent and the Mich. Cent. 60 per cent of the first $1,000,000 of net earnings, any amount over that to be divided on the basis of one-third and two-thirds, as before. But under the original contract each company is still accorded all benefit from the reduction in its fixed charges; consequently as the Michigan Central to Jan. 1, 1898, had reduced its charges about $327,000, that amount is credited to it before division is made V. 64, p. 5.

In April, 1901, it was reported that arrangements would probably be made to exchange the stock for Michigan Central bonds, secured by the former in trust.—(V. 72, p. 775.)

The Manitoba branch lines of the Northern Pacific Ry., aggregating 354 miles, with terminals at Winnipeg, are sub-let from the Provincial Government for 999 years from May 30, 1901, at a rental of $210,000 annually for the first ten years, then $225,000 for ten years, then $275,000 for ten years, and thereafter $300,000, with the option of purchase at any time for $7,000,000, the line to Port Arthur to be completed by Oct. 1, 1901, and one to be constructed from Sprague to Duluth, to insure a winter rail route for wheat. The Manitoba Government has the option to purchase the entire property in 1929 at par value and guarantees certain of the bonds. See below and V. 72, p. 437.

BONDS.—The Ontario division 4½s will be a first mortgage on the main line of that division, from Port Arthur to the Rainy River at the western boundary of the Province of Ontario, the terminals at Port Arthur and on 550,000 acres of land grant, and will constitute a general charge on the whole undertaking, subject to first mortgage charges created or to be created at not over $10,000 per mile on the various branches of the Ontario division and on the Winnipeg and Saskatchewan divisions and branches. Trustee is Nat. Bk. of Commerce, Toronto. Interest is guaranteed by the contractors, Mackenzie Mann & Co., of Toronto, Can., until one year after the line is opened for traffic. V. 70, p. 279, 739. Payment of one of the notes for $2,940,635 held by the Government was anticipated in Feb., 1900, and a second in Feb., 1901, in each instance releasing an equal amount of 4s deposited as collateral, which were sold; in Mar., 1901, $1,496,090 was paid on account of a third note due Aug , 1902.—V. 70, p.429, 480; V. 72, p. 437; V. 73, p. 82,

Of the above mileage 19 miles is narrow-gauge road. Of the "leased" 21 miles is on E. L. & B. S. and 9 miles on Washington line.

In April, 1901, the Greenbrier Ry., whose stock is owned, completed a branch line from Whitcomb Station on the C. & O. main line, up the Greenbrier River to its forks, 96 miles, within about 40 miles of West Va. Cent. & Pitts., which company was constructing a line to connect the two systems. In June, 1901, two branches, aggregating 43 miles, were opened, including the Guyandotte Valley branch, Huntingdon to Laurel Hill, 28 miles, which it was proposed to extend about 100 miles to Pineville, W. Va.

HISTORY, &c.—The former Chesapeake & Ohio was sold in foreclosure April 2, 1878, and this company organized. In 1888, under the direction of Drexel, Morgan & Co., reorganized without foreclosure, and the road extended to Cincinnati. The consolidation with the Richmond & Alleghany was consummated in January, 1890. The Elizabethtown Lexington & Big Sandy and other roads were absorbed in 1892.

CAPITAL STOCK.—Common stock is $60,527,800; increased from $45,000,000 to this figure since 1892 through exchange of practically all the $25,000,000 of preferred stocks for common stock and general mortgage 4½ per cents in certain proportions. *First preferred* for $13,600 and *second preferred* for $1,700 only was outstanding June 30, 1900. See terms of exchange in V. 54, p. 642. Stock may be reduced by majority vote of stockholders if deemed desirable.—V. 70, p. 175.

DIVIDENDS.—First div., 1 p. c., paid Oct., 1899; Nov., 1900, 1 p. c.

BONDS.—The *series A bonds of* 1878 cover the main line from Richmond, Va., via Charlottesville to Ashland, Ky., 428 miles, and are equally secured with the *Peninsular Extension* 6s by first mortgage on extension to Newport News, 75 miles.

The *consolidated mortgage* due in 1939 is for $30,000,000 (trustee, Central Trust Company), and sufficient bonds are reserved to provide for prior liens. This mortgage is also secured by deposit in trust of the $11,000,000 bonds and two-thirds of the stock of the Maysville & Big Sandy RR., [on road Ashland to Covington, Ky.], and of the Bridge to Cincinnati, all owned by Ches. & O. (Abstract, V. 49, p. 147.)

Richmond & Allegheny Division bonds cover the low-grade freight route from Richmond via Lynchburg to Clifton Forge and branches. (Mort. abstracts, V. 51, p. 144.)

The *general mortgage of* 1892 (Central Trust Co. and H. T. Wickham trustees) is for $70,000,000, but additional amounts at $25,000 per mile may be issued for double-tracking. Of the $70,000,000 as above, $32,691,000 bonds were reserved to provide for the $30,000,000 consols of 1889, issued or to be issued, etc. The balance unissued may be sold for new acquisitions, rolling stock, etc., but not more than $2,000,000 thereof in any one year. The mortgage covers the entire property of the company, real and personal, at the time the deed was made, and all additional property and mileage acquired with the proceeds of the bonds. See full abstract of mortgage in V. 54, p. 644; also V. 54, p. 642; V. 55, p. 335. In Jan., 1901, $28,809,000 had been listed on New York Stock Exchange, $1,500,000 having late in 1900 been sold for additions, improvements and double tracking.—V. 71, p. 553.

The *Elizabeth'n Lexington & Big Sandy* first mortgage bonds, interest on which has been reduced to 5 per cent, have been endorsed with the C. & O. guaranty of principal and interest, and general mortgage bonds have been set aside to retire them at maturity.

The *Louisville & Jeffersonville Bridge* bonds, of which $3,000,000 are outstanding, are guaranteed jointly and severally by the Chesapeake & Ohio and Cleveland Cincinnati Chicago & St. Louis; any deficit on account of the bridge is payable by them in the proportion of one-third and two-thirds respectively—see V. 60, p. 130; V. 61, p. 327, 559; V. 62, p. 84 and separate statement for L. & J. Bridge Co.

In Aug., 1900, a five-year car trust for $1,162,356 was made covering 1,500 flat and hopper-bottom cars.—V. 70, p. 894; V. 71, p. 553.

Of the *Greenbrier Ry.* 4s of 1900, guaranteed principal and interest, $1,000,000 are reserved for extensions and improvements. See guaranty, V. 72, p. 626.

OPERATIONS, FINANCES, &C.—Since the reorganization in 1888, when the control of the company was placed for five years in the hands of trustees, the property has been greatly enlarged and improved.

In Jan., 1900, Pennsylvania interests purchased a large block of stock, and with the Morgan-Vanderbilt interests now own a majority of the stock.—V. 70, p. 75, 632; V. 72, p. 480,

On June 30, 1900, the N. Y. Cent. & Hud. Riv. and Clev. Cin. Chic. & St. Louis owned stock representing outlays respectively of $1,638,455 and $2,453,569. V. 71, p. 398, 505. On Jan. 1, 1901, the Pennsylvania RR. proper owned $7,000,000 and the Northern Central $1,500,000 additional stock.

The interest charges for the fiscal year 1900-01 are estimated at $3,331,281, against $3,230,144 in 1899-00. V. 71, p. 553.

The C. & O. SS. Co line was formally opened Sept. 7, 1893, and owns six steamers, using the railroad wharves at Newport News. The Coastwise SS. Co., whose $636,800 bonds were purchased in 1899-0, owns 3 ocean tugs and 15 barges and leases 3 steamers. V. 71, p. 554.

The stockholders voted Oct. 23, 1900, to aid the Greenbrier Ry. to construct its road by guaranteeing its $2,000,000 4 per cent sinking fund bonds. V. 71, p. 554, 602. See above.—V. 69, p. 383.

ORGANIZATION—This *railway* company was organized in April, 1900, and purchased substantially all the stock of the Chicago & Alton *Railroad* Company, viz., $18,322,400 of the $18,751,100 common and $3,472,200 of the $3,479,500 preferred stock, all of which has been deposited as security under the first lien mortgage of 1900; also the line of the St. Louis Peoria & Northern between Springfield and Grove, 57 miles. The *railroad*, whose separate existence is maintained for legal reasons, has been leased for 99 years from April, 1900, the rental being the net earnings, after payment by the lessee of all interest on bonds, taxes and other charges, etc. (See V. 70, p. 686, 995.)

STOCK.—Authorized, $20,000,000 each of common and 4 per cent non-cum. preferred; issued in amounts as shown in table above, the unissued stock being reserved to exchange for the outstanding stock of the *railroad* company not now owned.

DIVIDENDS.—First semi-annual dividend on preferred, 2 p. c., paid Jan. 10, 1901; July, 2 p. c.

BONDS.—The first lien 3½s of 1900 are secured by practically the entire capital stock of the C. & A. *Railroad*, as shown above, and by a direct first lien on Springfield to Grove, 57 miles.—V. 70, p. 894, 944. (See application to list in full in V. 71, p. 1021.)

The *railroad* mortgage securing the 3 per cents of 1899 will refund bonds marked "¶" in table maturing during next four years and also provide fund for improvements and extensions. Bonds in excess of $40,000,000 may be issued thereunder on vote of three-quarters of stockholders for extensions of not over 500 miles, main track, at not exceeding $20,000 per mile, to fund leased line rental obligations and for future betterments not to exceed $5,000,000 at not over $1,000,000 per annum from Jan. 1, 1900. Stockholders in 1899-00 purchased $32,000,000 of the new 3 p. c. bonds at the rate of $650 cash for each $1,000 face value; V. 70, p. 739. ORGANIZATION, &C. This was a consolidation in July, 1875, of the Chicago Burlington & Quincy in Illinois and the Burlington & Missouri River in Iowa. Chicago Burlington & Northern and other subsidiary lines in Illinois were absorbed in May, 1899. V. 68, p. 975. In Dec., 1889, acquired Chicago Ft. Madison & Des M. RR. V. 70, p. 75. In June, 1900, the Kansas City & Omaha was acquired. V. 71, p. 134. The stockholders voted on Nov. 7, 1900, to purchase in fee the remaining leased lines in Iowa and Missouri held under lease, viz.: Kans. C. St. Jos. & Co. Bluffs, St. L. K. & N. W., Chic. Burl. & K. C., Han. & St. Jos., Keokuk & West. and Chic. Ft. Mad. & Des Moines, Burlington & Missouri River, etc.—V. 71, p. 697, 863, 963; V. 73, p. 137.

In July, 1901, over 96 per cent of the stock had been exchanged for the joint 20-year 4 p. c. bonds of the Gt. Northern and Northern Pac. secured by the deposit of the stock in trust, on the basis of $200 in bonds for each $100 stock, or an equivalent of a guaranty of 8 per cent on the stock. See circular, V. 72, p. 871, and description of bonds under Great Northern.

A branch from Alliance, Neb., to Guernsey, Wyoming, and from Brush, Col., north to a junction therewith at Northport, Neb., about 150 miles, was opened Sept., 1900, of which 23 miles is Union Pacific trackage. V. 71, p. 437. Extension from Toluca, Mont., to Cody City, Wyoming, 120 miles, is under construction, of which about 50 miles were operated in July, 1901. In Mar., 1901, the Davenport Rock Island & Northwestern Ry., Moline, Ill., to Clinton, Ia., 40 miles, was acquired jointly with the Chic. Milw. & St. Paul Ry.—V. 72, p. 532, 675.

CAPITAL STOCK.—The stock has been increased for the acquisition of new lines, and in 1880 a distribution of 20 per cent was made. From Sept. 1, 1890, to July, 1901, $15,486,900 stock was issued to retire an equal amount of convertible debentures, leaving still outstanding $716,700 convertible bonds. In April, 1899, $4,041,500 additional stock was subscribed at par, and stockholders of record on Feb. 7, 1901, subscribed at par to $9,922,700 new stock to the extent of 10 per cent of their holdings. Per cent. 8 yrly 5 4 5 4¼ 5 5 4¾ 4 yly. 5½ 6 yearly.

On June 15, 1901, 2 p. c. was paid for the 4 months ending July 1, 1901, when interest on the new collateral trust 4 per cent bonds began.—V. 72, p. 872.

SINKING FUNDS.—Included in the bonds outstanding in the table above are sundry bonds of the company which are held alive and drawing interest for account of the various sinking funds.

BONDS.—For full description of each loan see the editorial article on pages 3 to 6 of SUPPLEMENT of Oct., 1896, and CHRONICLE V. 63, p. 775.

The *mortgage of 1899 for $85,000,000* secures bonds dated July 1, 1899, maturing July 1, 1949, and to bear interest at not to exceed 5 per cent. Such bonds as may be issued bearing 3½ per cent interest will be subject to call at 105 per cent and accrued interest and those bearing interest at less than 3 p. c. at par and interest on any coupon day after thirty years. The issue is limited to $85,000,000, and the lien securing the bonds will become an absolute first mortgage, covering all lines east of the Mississippi River, upon the payment of $28,924,000 consolidated mortgage 7 per cent bonds due July 1, 1903, and of $2,320,000 Chicago & Iowa Division 5 per cent bonds due Feb. 1, 1905. Sufficient of the new loan is reserved to take up these $31,244,000 bonds and $23,238,000 were issued in 1899-1900, as below stated. The remainder of the loan will be available for additions, etc.—See V. 68, p. 771; *abstract*, V. 69, p. 283; V. 69, p. 795.

The *Iowa Division* bonds are a first mortgage on the main line in Iowa from Burlington to East Plattsmouth on the Mo. River, 278 miles, and on 122 miles of branches; they are also a first collateral lien on 420 miles of branches and 86 miles of second track. These bonds have a sinking fund of 1½ per cent ($203,800) yearly, for which the 4s are subject to call at 100, the 5s at 105. The single main line and branches covered "shall not exceed in the aggregate 900 miles," at $16,000 per mile; on second track (of which June 30, 1900, there were 86 miles) may be issued an additional $14,000 per mile. (V. 65, p. 462.)

Denver Ext. bonds can be increased only for 2nd track at $10,000 p. m.

The collateral trust *Nebraska extension* bonds of 1887 are issued at $20,000 per mile for single and $10.000 per mile for second track on not exceeding 1,500 miles. **Abstract** of deed V. 45, p. 441.

Burlington & Missouri RR. in Nebraska consol. mortgage of 1878 is for $14,000,000, and is now a 1st M. or 1st collateral lien; all except the $5,000,000 of *exempt* bonds are subject to call for the sinking fund at par, $278,600 having been retired in 1900. The "exempt" bonds may be called after 1908.

The 5 *per cent debentures* of 1890-92 are *convertible* $ for $ into stock any time prior to Dec. 1, 1902, except when books are closed. $15,486,900 had been thus converted up to July, 1901. V. 67, p. 842. See terms of conversion on page 5 of the SUPPLEMENT for Oct., 1896.

The Chicago Burlington & Quincy sinking funds for the several loans respectively held alive June 30, 1900, of the bonds given above as outstanding: Of g, $5,300,600 July 1, 1909; h, June 30, 1900, $1,931,000; k, $386,400 July 1, 1901. Also canceled bonds not included above, f, $3,364,000, July, 1900.

GENERAL FINANCES.—The Chicago Burlington & Quincy Railroad has been one of the most profitable in the country, as its numerous branches tributary to the main line were built into choice agricultural territory. Corn, however, being one of the principal articles carried by it, its earnings vary greatly according to the size of the crop.

In April, 1899, stockholders subscribed for $16,166,000 new 3½ per cent bonds at 75 and $4,041,500 stock at par. In March, 1901, stockholders subscribed to 10 per cent ($9,922,700) new stock, the proceeds to be applied about as follows: To redeem sinking fund 5s due Oct 5, 1901, $2,315,000; to reduce grades, etc., $2,000,000; to build road, Toluca, Mont., to Cody, Wyo., 120 miles, $2,000,000, and balance for equipment, real estate, etc.—V. 72, p. 136. The first issue of the bonds took up the bonds of Chicago Burlington & Northern RR. and $1,076,000 Ottawa Oswego & Fox River Valley bonds, amounting in all to $13,787,500, at a cost of $14,235,575. The balance is to be used for improvements. Interest on the new bonds began July 1, 1899. See circular V. 68, p. 771; V. 69, p. 751. The C. B. & N. was merged in May, 1899. In 1899-00 an additional $5,076,000 Illinois Div. bonds were sold for construction purposes, etc., and $4,972,000 were exchanged for underlying bonds.—V. 70, p. 739, 1248; V. 71, p. 751, 808.

The company's sinking funds have received to June 30, 1900 over $20,350,000. With this money about $8,000,000 of the company's bonds have been canceled, while the remainder of the cash not so used has been invested for the benefit of the several sinking fund loans in bonds that are held alive drawing interest and are therefore included in the company's outstanding debt. In 1899-0 the aggregate sinking fund income was $1,098,072, of which $487,4(0 is the amount carried direct to the sinking fund and the balance appears in the accounts merely as part interest on funded debt.

The road unbonded and the roads whose bonds were all owned on June 30, 1900 (V. 63, p. 775), were:

	Miles.
Northerly Extension, Alliance, Neb., to Billings, Mont., and branches.....	621

HISTORY, LEASES, &C.—Reorganized under existing title in 1877. In Nov., 1887, consolidated with two other co's (V. 46, p. 135), and on June 6, 1894, with Chicago & Indiana Coal RR. V. 58, p. 987; also V. 48, p. 334. Also owns $1,000,000 stock of Chic & Western Indiana—having all the local traffic of the latter road from Dolton into Chicago. In 1901 the traffic contract made in 1890 with the Evansville & Terre Haute for the operation of a through line between Chicago and Evansville was still in force. (V. 55, p. 995.) In Mar.,'97, the Chic. Paducah & Memphis, 100 miles, was purchased. In Dec., 1899, merged the controlled companies, the Evansville Terre Haute & Chicago and the Indiana Block Coal RR. V. 71, p. 389. An extension from Marion, Ill., to Thebes, 63 miles, connecting with the St. Louis Southwestern, was completed in Jan., 1900. V. 68, p. 231; V. 68, p. 771. Extension to Joppa, Ill., 16 miles, completed Jan., 1901.

In Dec., 1900, the Southern Ill. & Missouri Bridge Co. was incorporated in the interest of the C. & E. mortgage bonds, of which it owns all except $1,000. It also acquired the title to the Leav. & St. Joseph Ry. (23 miles), which is unencumbered.

The main line of the Wis. Minn. & Pac., extending from Red Wing, Minn., to Mankato, 93·7 miles, was purchased from Chic. R. I. & Pac. by friends of the C. G. W. and has been operated since June 1, 1899, in connection with latter, but the earnings kept separate. V. 68, p. 976. The W. M. & P. Ry. in Oct., 1900, made a $2,000,000 mortgage to the Mercantile Trust Co. of New York, as trustee.—V. 71, p. 751.

SECURITIES.—The holders of *debenture* and *preferred A* stock appoint the finance committee, which exercises general supervision of finances. Additional securities of said issues can be put out, but only with consent of a majority of both said classes of stock present at a meeting. Securities of other issues having a lien prior to preferred A can be created, but only with consent of two-thirds of both classes. The several classes in case of liquidation will have principal paid in gold, according to their priority right to dividends. At extraordinary general meetings of holders of debenture stock and preferred A stock collectively, holders of *one-tenth* of said stocks outstanding, present or represented, constitute a quorum and by a majority vote have power to sanction any modification of the rights of said stocks. The provisions of the several classes of stock were fully set forth in the editorial article of the SUPPLEMENT for October, 1897; see also V. 71, p. 441.

In 1898 the authorized issue of 4 p. c. debenture stock was increased from $15,000,000 to $30,000,000 for future refunding and improvements. See General Finances below.—V. 66, p. 133, 663, 1088.

In May, 1901, the company was proposing to issue $2,000,000 preferred B stock in exchange, dollar for dollar, for the stock of the Wisconsin Minnesota & Pacific RR., Red Wing, Minn., to Mankato, 94 miles. See above.—V. 72, p. 935, 1279; V. 71, p. 751.

Cash interest resumed on all debenture stock and *all* the preferred "A" is entitled to cash dividends since July 1, 1899.—V. 67, p. 1206.

DIVIDENDS.—On pref. "A" paid Jan., 1899, 2 p.c.; in July, 1899 2 p. c.; in 1900, 5 p. c.; in 1901, 5 p. c.

FINANCES.—The deb. and pref. "A" stockholders voted Jan. 30, 1899, to issue $8,000,000 debenture stock, in order to refund the Ch. St. P. & K. C. priority loan (the only mortgage debt), which was paid Jan. 1, 1900, and then outstanding lease warrants and sterling notes; of this stock there remained unissued March, 1901, $2,150,000, to provide for paving sterling notes and lease warrants maturing, additions and improvements. Early in 1901 the company was issuing an additional $2,500,000 of 4 per cent debenture stock for capital expenditures in 1901, car trusts, etc.—V. 72, p. 580, 935, 1279. By improvements of the permanent way, etc., operating expenses were reduced in 1899-1900 to 66·81 per cent of earnings, against 70·13 per cent in 1897-8 and 77·47 in 1894-5.—V. 71, p. 441.

Early in 1901 Vermilye & Co. became the fiscal agents of the company, their Mr. Read entering the directory. See V. 72, p. 580.

In Mar., 1901, a syndicate subscribed $2,500,000 to acquire all the stock and bonds of the Mason City & Fort Dodge RR., Mason City to Fort Dodge, Ia., 90 miles, the purchase including coal fields near Ft. Financial arrangements were also made for $8,000,000 to build an extension to Omaha, 131 miles, and to Sioux City, 143 miles, a total of 274 miles.—V. 72, p. 580, 674, 987. In June, 1901, the Duluth Red Wing & Southern Ry., Red Wing to Zumbrota, Minn., 25 miles, was purchased in interest of Chicago Great Western Ry.—V. 72, p. 1279.

HISTORY, &c.—The Milwaukee & St. Paul RR. Co. was organized May 5, 1863, and on Feb. 11, 1874, took its present name. The system has since been greatly extended by the construction and acquisition of other lines. The sale of the Milwaukee & Northern to the St. Paul was ratified in September, 1893. In July, 1899, the Des Moines Nor. & West, 147 miles, was merged. V. 71, p. 494. The stockholders voted Sept. 23, 1899, to merge by consolidation the leased lines in Illinois. V. 69, p. 228, 694. In Sept., 1900, arranged with the Northern Pacific for trackage from St. Paul to Duluth. V. 71, p. 236, 603. Various extensions were built and building in 1900 '01. In Mar., 1901, the entire stock of the Davenport Rock Island & Northwestern Ry., Moline, Ill., to Clinton, Iowa, 40 miles, was acquired jointly with the Chic. Burl. & Quincy RR., and the road will be used as part of a cut-off to be built in 1901 from Davenport to Ottumwa, 119 miles, between Chicago & Kansas City. V. 72, p. 437, 532, 675.

CAPITAL STOCKS.—The preferred stock has a prior right over the common stock to a dividend of not over 7 per cent from net earnings in each year, but if not earned it has no cumulative right. After payment of 7 per cent on preferred and 7 on common, both classes share *pro rata*. Common stock to be $55,963,900, stockholders subscribing at par to a 10 per cent increase, ($8,815,300) in April, 1901. See GENERAL FINANCES below. V. 72, p. 437. Preferred stock on Dec. 31, 1873, was $12,274,483; it has been increased to present figures almost entirely by exchange of convertible bonds for stock, only about $5,000,000 having been issued for other purposes (improvements, etc.) In July, 1900, $10,697,500 prior lien bonds outstanding were exchangeable for preferred.

In December, 1891, the Milwaukee Lake Shore & Western RR. was bought by an exchange of stock. See V. 57, p. 375; V, 56, p. 792.

In 1900 various proprietary roads were purchased and others built in the interest of the C. & N. W. absorbed.—V. 71, p. 291, 294

CAPITAL STOCK.—Of the common stock $2,333,688, and *preferred* $3,795 remained in the co's treasury in July, 1900. Pref. stock has a prior right to 7 p. c.; then common 7 p. c.; then preferred 3 per cent; then common 3 per cent; then both classes share.

Bonds.—*General Mortgage.*—See **Abstract in V. 65, p. 1175.** The authorized issue is $165,000,000 (United States Trust Co., trustee). $131,640,000 are reserved to retire underlying bonds, and remainder for additions and improvements, $4,000,000 at once and $1,000,000 a year thereafter. The bonds may be issued bearing such rate of interest as shall be deemed advisable. See V. 65, p. 1070. The first issue of $20,000,000, bears 3½ per cent (reg. interest Q.—F., coupon M. & N.). V. 65, p. 69, 111, 571. Up to July, 1901, $12,145,000 had been listed. V. 67, p. 125; V. 72, p. 86.

The *sinking fund bonds* of 1879 are secured by deposit in trust of $15,000,000 of 1st mortgage bonds at $15,000 per mile on subsidiary lines, the most important being described in Supplement of May, 1894. Of the sinking fund bonds of 1879 $6,069,000 are 6s; the sinking fund is at least 1 per cent of outstanding bonds, which are subject to call at 105; and through its operation the amount outstanding has been reduced from $15,000,000 to the figure in table.

The *sinking fund debentures* of 1933 have a sinking fund of $200,000 per year, if they can be redeemed at 105. These, as also the *debentures* of 1884 and 1891, will be secured by any future mortgage excepting any mortgage "for the enlargement, improvement or extension of the company's property." See description of all the debentures on page 2, Supplement of April, 1895. The 25-year debenture mortgage of 1884 was for $6,000,000, but reduced by sink. fund purchases.

The *extension bonds of* 1886 are secured by deposit in trust of first mortgage bonds at a rate not exceeding $20,000 per mile. Included in the collateral June 1, 1896, were $10,675,000 Fremont Elk Horn & Mo. Valley 1sts and $2,560,000 Wyoming Central 1sts [the Wy. Cent. having been consolidated with F. E. & M. V.], etc. To July, 1901, Extension 4s for $18,632,000 had been listed on N. Y. Stock Exchange, of which, June 1, 1900, $1,143,000 were held alive in sinking funds. See F. E. & M. V. bonds below. Union Trust Co. of N. Y., trustee.

The *Fremont Elkhorn & Missouri Valley* consols have a first lien on 1,170 miles (Fremont, Neb., to Deadwood, D. T., 557 miles, and branches to Hastings, Albion, &c., 613 miles), but besides the amount of issue given as outstanding in the table $10,675,000 are held as part collateral for Chicago & Northwestern extension bonds of 1886. The Northwestern assumed $3,600,000 of the Fremont Elkhorn & Missouri Valley bonds and guarantees the rest. See guaranty V. 56, p. 650.

The *Milwaukee Lake Shore & Western* debentures of 1887 were by their terms convertible into M. L. S. & W. stock, but North Western officials state that the bonds are not convertible into North West stock.

The Boyer Valley Minnesota & Iowa, Boone County Mankato & New Ulm, Minneso a & South Dakota and Iowa Minnesota & Northwestern bonds were assumed in June 1900, the roads being absorbed upon completion. See V, 71, p. 28, 291, 294, 340.

Land Grant.—Lands and lot sales in 1899-00, $834,218; net cash receipts, $599,387; lands unsold May 31, 1900, 600,871 acres.

General Finances.—The first issue of ($20,000,000) refunding bonds at 3½ per cent interest was sold to provide for $18,015,500 old bonds maturing up to Dec. 1, 1902. If the entire issue of $20,000,000 is required to refund these old bonds the saving in interest charges will be about $530,000 per annum—see "bonds" above and V. 65, p. 69, 111. In Jan., 1901, $9,680,000 old bonds had been exchanged for gen. 3½s, leaving $27,962,000 still outstanding. See V. 72, p. 86.

In 1899-00 the average freight train load was 235 tons, against 208 tons in 1898-9; rate per ton mile, 0·83 of a cent.

Earnings.—Advance report for fiscal year in V. 72, p. 1134, showed:

The reorganization plan of 1895 was in V. 61, p. 368.

In January, 1898, control of the N. Y. Susquehanna & Western was obtained. The road is operated as an independent line.—V. 66, p. 83, 335, 573, and editorial p. 53. See STOCK below.

In March, 1901, nearly entire stock of Pennsylvania Coal Co. was acquired, the purchase including valuable coal mines. Erie & Wyoming Valley RR., Scranton, Pa., to Lackawaxen, 64 miles, 48 miles of gravity road with terminus at Hawley, Pa., and the Hawley branch, 13 miles, leased to the Erie. See BONDS below.—V. 71, p. 1219, 1311; V. 72, p. 44, 136, 241, 532, 627.

COAL AND STEAMBOAT PROPERTY.—The *Erie* coal properties represent an aggregate of 10,500 acres of anthracite, of which about 9,000 acres are held in fee; also 53,000 acres of bituminous coal lands held in fee 14,000 acres of bituminous held under mineral rights. Its coal tonnage in the year 1899-00 aggregated 12,701,256, out of the 26,947,892 tons hauled. The Union Steamboat Co. has its terminal and other properties in Buffalo and a fleet of eight lake steamers. See V. 63, p. 514. The *Pennsylvania* coal properties acquired in 1900 are additional. See above.

STOCK.—The *stock* is to be held by J. Pierpont Morgan, Louis Fitzgerald and Charles Tennant, Bart., voting trustees, for five years, and thereafter until the new first preferred stock shall have received 4 per cent cash dividend in one year. The new company reserves the right to redeem either class of its preferred stock at par in cash. Provisions of voting trust and preferred stock certificate were given in SUPPLEMENT of April, 1897, page 3.

In Mar., 1898, Erie 1st pref. stock was increased from $30,000,000 to $43,000,000, and common stock from $100,000000 to $113,000,000, to acquire New York Susq. & Western stock.—See V. 66, p. 335, 573. The 1st pref stock was further increased in 1901 $5,000,000 in connection with the purchase of the Pennsylvania Coal Co.—V. 72, p. 136.

DIVIDENDS.—First semi-annual dividend on 1st pref., 1½ p. c., from earnings of six months ending June 30, 1901, is payable Aug. 30, 1901.—V. 73, p. 137.

BONDS.—The new first consolidated mortgage is for $175,000,000 [Farmers' Loan & Trust Co. trustee]—see **abstract** of deed V. 62, p. 89, and secures $35,000,000 prior lien and $140,000,000 general lien bonds.

Of the $140,000,000 *general lien bonds*, $91,003,000 are reserved for the ultimate acquisition of bonds and guaranteed stocks left undisturbed on various parts of the system [see list V. 62, p. 89], and $17,000,000 were reserved for new construction, betterments, additions, etc., after 1897, under carefully guarded restrictions, not over $1,000,000 to be used in any one year.

The position of the first consolidated mortgage is substantially as follows: It is a first lien [mortgage or collateral, the prior lien bonds, however, preceding the general lien bonds] upon the company's chief coal properties (except Penn. Coal Co.) upon its water transportation lines, including valuable terminal properties appurtenant thereto, and upon a number of profitable local lines in New Jersey and near Buffalo; it is a *second lien* upon certain minor coal properties and upon the railroads leading to all the coal properties, upon the terminals at Jersey City, upon the Buffalo New York & Erie Railroad (the main line to Buffalo) and the Buffalo terminal properties other than those upon which it is first lien, and upon the entire line from Salamanca to Chicago; it is a *second consolidated mortgage* upon the lines between Piermont and Dunkirk (446 miles.)

The collateral trust 4s of 1901 are secured by 51 per cent of the entire New York Susquehanna & Western stock ($8,000,000 total issue), nearly all of the Pennsylvania Coal Co. stock, and the stock of the Erie & Wyoming Valley RR., Scranton, Pa., to Lackawaxen, 64 miles, and the Delaware Valley & Kingston RR. Of the bonds $32,000,000 were issued to acquire these stocks (excepting the N. Y., Susq. & Western, already owned), the remaining $4,000,000 being reserved for improvements to the properties represented by the stocks acquired. A sinking fund of 10 cents per ton of coal sold will purchase bonds at not exceeding 105, otherwise to be applied to the drawing of bonds by lot, all such bonds to be kept alive and the accruing interest thereon to be added to the sinking fund, which, it was estimated, will be sufficient to retire the whole issue at or before maturity.—V. 71, p. 1219, 1311; V. 72, p. 44, and circular, p. 136, 532, 257.

Real estate mortgages outstanding Oct., 31, 1900, $43.

Old Bonds—Under the first consol. mortgage of 1895 the company covenants to pay the interest regularly on all the old bonds in the table that are marked with a * or a ‡ (except N. J. & N. Y. bonds,) and to take them up and pledge them with the trustee at maturity.

Long Dock 6s see March, 1894, SUPPLEMENT under N. Y. L. E. & W. For *N. Y. Lake Erie & W. Coal & RR.*, see SUP. January, 1895.

The $1,777,990 equipment trusts of 1900 cover 1,000 steel freight cars and 50 consolidated freight locomotives.

FIXED CHARGES.—The fixed charges of the System were reduced by the reorganization from $9,400,000 to $7,860,000 per annum.

GENERAL FINANCES.—To June 1, 1900, $4,000,000 of $5,000,000 prior lien bonds reserved for construction and new equipment were sold; also $1,903,000 general lien bonds issued for construction, etc.—V. 71, p. 754, 1219. The first dividend on first preferred was declared in July, 1901.—See above and V. 73, p. 137.

The purchase of the control of the Pennsylvania Coal Co. late in 1900 removed the possibility of an independent anthracite coal line to tidewater. The acquisition was financed by the issue of $32,000,000 collateral trust 4 per cent gold bonds and $5,000,000 first pref. stock.—V. 71, p. 1219, 1311; V. 72, p. 44, 136, 532.

V. 71, p. 655. In 1900 $1,000,000 stock was offered to Employes' Investment Co., of which $285,000 had been subscribed and paid for in July, 1901.—V. 71, p. 654.

Missouri Pacific Ry.—(*See Map.*)—Operates important system of roads extending westerly and southwesterly from St. Louis, Mo., including main lines from St. Louis to Omaha, Neb., 495 miles, and from Kansas City to Denver, Col., 758 miles, with many branches in Kansas, etc. Through the St. Louis Iron Mt. & Southern, which it controls, connection is had with Texas and the lines of the Texas & Pacific, International & Great Northern and the St. Louis Southwestern, the whole forming what is known as the "Gould System," in which the heirs of Jay Gould are largely interested (see list of Mr. Gould's holdings, V. 60, p. 83.) The Mo. Pac. property includes:

Also owns all capital stock of Central Branch Union Pac., etc., 388 m.; St. Louis Iron Mountain & Southern and leased lines, 1,773 miles. Grand total Missouri Pacific mileage January 1, 1901, 5,324 miles. In 1901 extension building from Oronogo to Webb City, Mo., 40 miles, and Boonville to Jefferson City, 22 miles

Early in 1901 a large interest was acquired in the Denver & Rio Grande RR. and so in the Rio Grande Western Ry., extending the system as far west as Ogden, Utah. The Gould and Rockefeller holdings in the Denver & Rio Grande are together understood to constitute a large majority of the entire capital stock. A more or less comprehensive consolidation of the Gould, or Gould-Rockefeller, lines, it is understood, is in contemplation, though in June, 1901, not expected to be announced for some time.

In Feb., 1901, control of the New Orleans & Northwestern Ry., Bastrop, La., to Natchez, Miss., 102 miles, was acquired, the road to be extended from Natchez to Little Rock, Ark., about 150 miles; also of the Arkansas & Southwestern RR., Smithton to Pike City, 43 miles; of the Ark. Midland RR., Helena, Ark., to Clarendon, etc., 74 miles, and of the Mississippi Hamburg & Western Ry., Hamburg to Luna, Ark., 43 miles. In Mar., 1901, the White River RR. was incorporated to build from Batesville, Ark., northwest to Springfield, Mo., 150 miles.

Organization, Leases, &c.—The Pacific RR. of Missouri was sold in foreclosure September 6, 1876. The present company was a consolidation in August, 1880, embracing the Missouri Pacific and minor roads. The bonds of the proprietary lines are practically all pledged to secure

See V. 68, p. 329, 520. In Nov., 1900, purchased entire stock of Kansas City Northwestern Ry. V. 71, p. 1121. As to Texas & Pac., see below.

STOCK.—In July, 1901, the authorized capital stock was increased from $70,000,000 to $100,000,000. The amount outstanding on Dec. 31, 1900, was $50,432,150, and this latter was increased to $66,618,150 by the conversion of $11,686,000 collateral trust bonds and $4,500,000 sold to acquire $12,000,000 Denver & Rio Grande RR. stock. Stockholders of record on July 18 were given the right to subscribe to new stock at par to the extent of 15 per cent of their holdings, the subscription being payable on or before Aug. 1, 1901, raising the amount outstanding to $76,616,873. The estimated surplus in 1901 applicable to dividends, not including any income of railroad properties supposedly acquired with the proceeds of the new stock, is $8,807,000 (against $3,306,000 in 1900), or over 11 per cent on the stock as increased. New York Central & Hudson River RR.—*(See Map.)*—

HISTORY, &c.—Control of the Lake Shore and Michigan Central roads was acquired in 1898, as stated below. In 1899-00 their earnings were reported separately, but the $3,827,521 dividends on their shares held by the Central chiefly caused the large increase in "other income," compared with 1897 98, offset by a like amount of interest on the collateral bonds issued for their purchase. V. 71, p. 502.

In Jan., 1900, control of the Lake Erie & Western was acquired, also a large interest in the Cleve. Cin. Chic. & St. Louis, increasing the Vanderbilt interest in the latter to an absolute majority. The Central has since transferred its holdings in these companies to the Lake Shore, which see. In 1900, also, an understanding was reached between the Vanderbilt and the Pennsylvania interests, by which the latter became jointly interested in Ches. & Ohio Ry.—V. 70, p. 76, 125, 1049. Holdings Vanderbilt estate, V. 71, p. 1221.

BONDS.—Description of debentures was on page 3 of SUPPLEMENT of April, 1895. They are all secured by the refunding mortgage of 1897 equally with the 3½s. *Ref. mortgage* is for \$100,000,000, of which \$70,377,333 reserved to retire all existing bonds at or before maturity and \$14,622,667 for premiums; the remainder (\$15,000,000) is reserved for new construction after 1903. In 1900 3½s of 1897 had been issued to retire about \$31,000,000 of old bonds.

Collateral trust 3½s of 1898 are secured respectively by deposit in trust with the Guaranty Trust Co., mortgage trustee, of stock of the Lake Shore & Michigan Southern and Michigan Central RRs. at the rate of \$100 of L. S. & M. S. stock for each \$200 of bonds and \$100 of Mich. Cent. stock for each \$115 of bonds outstanding. The total authorized issues of 3½s are \$100,000,000 for Lake Shore and \$21,550,000 for Michigan Central. The loans are secured by separate deeds of trust. See V. 66, p. 288, 336, 760, 811.

The N. Y. Cent. issued in 1900 \$5,500,000 of 100-year 3½ per cent debentures for certain property not included in the Boston & Albany lease. See V. 69, p. 1102; V. 71, p. 502, 964.

GUARANTIES.—The company guarantees the securities of its leased lines to a considerable aggregate—see separate statement for each company marked with a ¶ in the table of mileage preceding. It also guarantees Western Transit Co. 4½s for \$1,000,000 due February, 1903.

GENERAL FINANCES.—The refunding of the \$70,377,000 of old high-interest-bearing bonds into the 3½s of 1897 during the years 1898 to 1905 will effect a saving of \$1,200,000 per annum in interest charges; to June 30, 1900, \$30,671,479 old bonds had thus been retired; saving in charges by refunding in 1899-00, \$512,776.—V. 71, p. 502.

In Apr., 1901, the company had acquired \$45,289,200 of the capital stock of the Lake Shore road in exchange for 3½ p.c. bonds (see above), leaving \$4,177,300 afloat, including \$533,500 guaranteed 10 per cent dividends (see V. 66, p. 288, 336, 1238), and also \$16,583,700 of Mich. Central stock, leaving \$2,154,300 still outstanding.

On April 2, 1900, \$15,000,000 stock, sold to stockholders at par, was issued for new equipment. V. 69, p. 906, 1103, 1248; V. 71, p. 502. On Nov. 10, 1900, Boston & Albany RR. was taken over under lease.

From surplus for year ending June 30, 1901, \$1,500,000 was appropriated for renewal of bridges in addition to \$2,000,000 appropriated in 1899-00.—V. 72, p. 1188.

Average train load for entire system, including company's freight, was 398 tons in 1899-00, against 361 tons in 1898-9.

GENERAL FINANCES.—Early in 1899, the coal properties at Scranton, Pa., of the Lack. Iron & Steel Co., (the capacity of the collieries then open being about 700,000 tons per annum) were purchased by the Scranton Coal Co., aided by loans from the N. Y. O. & W., the latter issuing its $2,500,000 5 p. c. notes (reduced to $2,400,000 in 1900-1901), extending over a period of years secured by first mortgage on the coal property, and loaning $1,475,000 (of which $305,000 has been repaid) secured by a second mortgage thereon, the O. & W. obtaining a contract for the entire tonnage. V. 68, p. 41, 429. The coal companies are expected ultimately to take care of all the obligations created.—V. 69, p. 604, 646.

In November, 1900, eight independent anthracite properties with a maximum output of 2,000,000 tons annually were merged as the Elk Hill Coal & Iron Co., the N. Y. O. & W. issuing its $3,500,000 5 per cent sinking fund first lien gold notes secured by the Coal & Iron Company's first mortgage, these notes maturing $75,000 each 6 mos., beginning June 1, 1901, to June 1, 1911, and thereafter $200,000 semi annually to Dec. 1, 1915. In the event of any additional mortgages being placed on the railroad properties besides the refunding mortgage, the notes are to be secured pari passu with such new obligations. The Elk Hill Co. also made a second mortgage to the N. Y. O. & W. for $2,400,000 at 5 per cent. V. 71, p. 1270.

The company's coal tonnage is derived from the following sources: Scranton and Elk Hill companies (as above stated), total maximum capacity, 2,700,000 tons; other companies, 300,000.

The old stock paid an assessment of $12 50 per share, common receiving 75 p. c. and the old pref. 112½ p. c. in new common. In 1900 the Penn. RR., together with controlled company, acquired $21,500,000 of the stock, its representatives entering the directory. V. 70, p. 687, 1150, 1195; V. 71, p. 809; V. 72, p. 184, 480. In 1901 the entire stock of the Cincinnati Portsmouth & Virginia, 130 miles, was acquired, and the road merged July 1, 1901.—(V. 72, p, 137, 438, 532.)

STOCK.—Provisions of preferred stock certificates were given in SUPPLEMENT of April, 1897, page 4, said stock being 4 p. c. non-cumulative, with preference as to assets and dividends.

BONDS.—The first consolidated mortgage of 1896 is limited to $62,500,000, of which an amount equal to the underlying bonds can be issued only on the retirement of the same. The balance is or was reserved as follows: For new construction, acquisitions and improvements, not exceeding $1,000,000 yearly, $9,690,436 and $3,500,000 additional for similar purposes. The right to issue prior lien bonds has been annulled.—V. 72, p. 438.

The *new 4 per cent first consols* are a first mortgage on a large part of the system, viz., upon 833 miles of railroad; upon important terminals at Norfolk and Lamberts Point; upon the Ohio River Bridge and the Roanoke Machine Works; besides being a consolidated mortgage upon the remainder of the system, subject to the undisturbed liens. They are further secured by the equipment, certified to have cost over $11,000,000, covered by the car trusts and equipment bonds to be taken up under the plan. Undisturbed bonds which cannot be taken up at maturity on satisfactory terms by use of the consols reserved for that purpose may be extended or renewed. See **abstract** in V. 64, p. 376. The lien of the mortgage was extended over the Cincin. Portsm. & Va., acquired in 1901, after redemption of the bonds on July 1.—(V. 72, p. 137, 438, 532, 723, 1080.)

GENERAL FINANCES.—The reorganization reduced the fixed charges from $3,214,037 to $2,218,450, a reduction of $995,587, making the annual charges ahead of the new common stock smaller than those ahead of the old preferred stock. Of the traffic in 1899-1900 55 per cent (5,989,577 tons) was bituminous coal and coke.

In March, 1899, $5,000,000 1st consol. 4s were sold, of which $1,500,000 to be used for betterments, double-tracking and additional rolling stock; remainder to retire underlying bonds maturing to July 1, 1900. V. 68, p. 619; V. 70, p. 176, 1195; V. 71, p. 497. Dividends on the common stock were begun in June, 1901.—V. 72, p. 873.

Northern Pacific Ry. (Concluded.)—

The original Northern Pacific Company was chartered by Congress July 6, 1864; 450 miles to Bismarck were foreclosed in 1875. On Feb. 1, 1898, took over Seattle & International, and in July, 1898, the Washington Central under lease (V. 66, p. 856), and in February, 1898, purchased the entire capital stock and all of the income bonds of the Washington & Columbia River Ry. See separate statements for these Washington companies. All, or substantially all, of the securities of the Seattle & International Ry. are owned, and on Apr. 1, 1901, merged road in system. On July 1, 1900, the St. Paul & Duluth RR., St. Paul to Duluth, etc., 238 miles, was merged, its bonded debt being assumed.—V. 70, p. 1250; V. 71, p. 648. In Nov., 1900, extension completed from Milnor, N. D., to Oakes, 33 miles.

HISTORY.—This Wisconsin company on Sept. 1, 1896, succeeded to the railroads, land grant and other property of the Northern Pacific RR., foreclosed in July, 1896, and reorganized per plan in V. 62, p. 550.

In the reorganization the $49,000,000 old common stock paying assessment of 15 per cent received 100 per cent of new common. The $35,000,000 old preferred paying assessment of 10 per cent received 50 per cent in new common and the same of new preferred.

The road is controlled by J. P. Morgan & Co. and James J. Hill on the one hand, and the Harriman-Kuhn, Loeb & Co. Union Pacific syndicate (the latter acquiring its interest about May, 1901,) on the other; and in July, 1901, in pursuance of a plan for "complete and perfect harmony," the following representatives of the various Western railroad interests were about to enter the Board: James J Hill, of the Great Northern; E. H. Harriman, of the Union Pacific; Wm. Rockefeller of the St. Paul; H. McK. Twombly of the Chic. & North Western and Samuel Rea of the Pennsylvania RR.—V. 72, p. 936, 1081; V. 73, p. 138.

STOCK.—The new preferred stock is subject to call in whole or in part, at par, upon any first day of January prior to 1917.

Additional preferred stock and other mortgages on the company's property, as existing at the completion of the reorganization, can be issued only with the consent of a majority of each class of stock represented at a special meeting. Pref. stock is "entitled to non-cum. dividends to the extent of 4 per cent per annum, payable quarterly out of surplus net earnings in each fiscal year before any dividends for such year shall be paid on the common stock." In any fiscal year in which 4 per cent dividends shall have been declared on both preferred and common stock, all shares, whether preferred or common, shall participate equally in any further dividends for such year. Dividends upon stock registered in Berlin may be collected there at the rate of 4·20 marks per $.—V. 63, p. 1071.

ORGANIZATION, LEASES, &C.—The charter of the Pennsylvania Railroad was dated April 13, 1846. The Pennsylvania *Company* controls all the lines west of Pittsburg and Erie, the Pennsylvania RR. Co. holding all its stock. In Jan., 1900, the Penn. RR. purchased stock in the Baltimore & Ohio RR., the Chesapeake & Ohio Ry. and the Norfolk & Western Ry. V. 70, p. 76, 231, 687; V. 72, p. 481, 581. In 1900 acquired the greater part of the $20,000,000 Western N. Y. & Penn. Ry. stock at $9 per $50 share and also the $10,000,000 income bonds at $300 per $1,000 bond.—V. 72, p. 481.

The Western New York & Pennsylvania Ry. and the Allegheny Valley Ry. were taken over under lease August 1, 1900, adding about 829 miles to the system proper. (V. 72, p. 491.) In May, 1900, purchased a majority of the Long Island RR. stock. V. 72, p. 481. See GENERAL FINANCES below. In June, 1900, purchased nearly all the stock and bonds of the Baltimore & Delaware Bay RR., 45 miles.—V. 70, p. 1248; V. 70, p. 842, 1095.

SECURITIES OWNED.—The total cost of these to January 1, 1901, was $164,965,438, most of which are pledged to secure Pennsylvania issues. Revenue derived from these securities in 1900, $5,781,297.

CAPITAL STOCK.—Stock authorized, $251,700,000; the amount outstanding has been increased from time to time, chiefly by sale at par to stockholders for new acquisitions, etc. See Gen. Finances below.

BONDS.—*Consolidated mort.* of 1873 for $100,000,000 secures all the consols equally, though issued at different dates; of the amount authorized, a sufficient amount is reserved to retire the general mortgage of 1867. It covers all the property and franchises of the company, including its main line from Philadelphia to Pittsburg, and branches, being a total of 517 miles, partly four-tracked, together with real estate and equipment. It is also a first lien on the company's leasehold interest in other railroad lines and canals, as well as on shares and bonds of other companies of an estimated cash value of over $50,000,000. Sinking fund for consols Jan. 1, 1901, held—Consols canceled, $1,860 980; other securities and cash $5,150,564.

The 4 *per cent loan of* 1881 is secured by Phila. Wilm. & Balt. stock. Mortgages and ground rents payable Jan. 1, 1901, $5,066,696.

GUARANTEED BONDS.—See SUPPLEMENT of April, 1899.

GENERAL FINANCES.—To pay for the stock of the Long Island and other railroads acquired, the company in May, 1900, borrowed $20,650,000 at 4 per cent for one year, with privilege of renewal, which amount is supposed to have been increased since Jan. 1, 1901, for purchase of Balt. & Ohio and other stocks.—V. 70, p 946.

On March 12, 1901, the stockholders voted to increase the stock by $100,000,000 to $251,700,000; $50,300,800 of the new stock being subscribed for by stockholders at $60 per $50 share, raising the amount outstanding to $202,200,800. The new stock will be entitled to dividends beginning Nov. 1, 1901. The proceeds were used to pay off the collateral investment obligations of the company for construction and equipment expenditures on the main and leased lines and branches and for other corporate purposes.—V. 72, p. 592, 533, 627, 1238, 1280.

In June, 1901, the company for itself and controlled and affiliated roads, together with the Reading Co., obtained control of the Pennsylvania and Cambria Steel companies, thus insuring the ability of the system to purchase rails and other steel and iron materials at a satisfactory rate.—V. 72, p. 1280.

From the company's docks at the extensive terminal at Port Richmond it operates a line of steamers and barges in coastwise coal traffic and provides berths with elevators and ample accommodations for several trans-Atlantic steamship lines. In Oct., 1900, Reading Belt Ry., 7½ miles, was under construction. V. 71, p. 758. In Jan., 1901, control of the Central RR. of New Jersey was acquired. V. 72, p. 86, 340, 392, 676.

ORGANIZATION.—The Philadelphia & Reading RR. (chartered April 4, 1833) and the P. & R. Coal & Iron Co. were sold in foreclosure Sept. 23, '96, and reorganized per **plan** in V. 61, p. 1109. See V. 64, p. 709.

In the reorganization the 41 millions of old stock and the 56¾ millions of old preference income bonds were assessed 20 per cent, the stock then receiving 100 per cent in new common and the preference incomes, common and preferred stock in certain proportions.

The "Reading Company" in the reorganization acquired the securities, holdings, real estate, equipment, etc., of the old Phila. & Reading RR. Co. also $20,000,000 stock and $20,000,000 bonds of the Phila. & Reading Ry. and the $8,000,000 stock of the Coal & Iron Co., and against all this property issues its own securities. See V. 64, p. 709.

The property of the Reading Company, as distinguished from the property of the Phila. & Reading Ry. Co. (which owns the railroad but no equipment), and the Coal & Iron Co., consists of the following:

Railway equip. leased to Ry. Co. for 8 p. c. yearly.....	$18,183,212

VOTING TRUST, ETC.—All classes of stock of the new company are to be held by voting trustees (J. Pierpont Morgan, Frederic P. Olcott and C. S. W. Packard) for five years, and thereafter until 4 p. c. cash dividend per annum shall be paid on the first preferred stock for two consecutive years, though the trustees may in their discretion surrender the stock at an earlier date. The company may, after dividends of 4% have been paid on the first preferred for two consecutive years, convert the second preferred stock into one-half first preferred and one-half common stock. As to rights, see V. 64, p. 709. **Voting trust**, V. 64, p. 955, and SUP. of April, 1897, page 5.

SINKING FUND.—Whenever, in any year, a dividend is paid on the stock, an amount must be paid simultaneously to the trustee equal to 5 cents per ton on all coal mined by the Coal & Iron Company during the preceding year, if the aggregate of dividends so declared exceeds that sum; otherwise such lesser sum as shall equal the dividends so declared. Under this provision $383,525 was set aside in Mar., 1900, and $433,000 general mortgage 4s canceled; in year 1900-01 sinking fund about $750,000.—V. 72, p. 283.

DIVIDENDS.—Dividends on 1st preferred 1½ p. c., paid March, 1900 Sept., 1900, 1½ p. c.; 1901, Mar. 8, 2 p. c.—V. 72, p. 283.

BONDS.—The *General Mortgage* 4s (**abstract** V. 64, p. 612) are secured by mortgage and pledge of all properties and securities embraced in the reorganization, and also all other property acquired thereafter by use of the new bonds. They have above sinking fund out of the revenues from the Coal & Iron Company, but are not subject to compulsory redemption prior to maturity. The new mortgage is also, subject only to the bonds for which reservation is made, based upon properties or securities of all the lines of railroad owned, including the Philadelphia & Reading Railway Company proper, 365 miles; various leasehold lines, 635 miles; all the property of the Coal & Iron Company, or the securities thereof, representing nearly 200,000 acres of coal and timber land; equipment valued at about $18,000,000, also marine equip. See application to list in V. 64, p. 709.

Furthermore, it has a first lien upon a majority of the capital stock of various companies in the system owning 453 miles of railroad, and also on various bonds of system—list in V. 64, p. 613. Of the $135,000,000 fours of 1897 $51,692,500 are reserved to take up undisturbed bonds and $17,000,000 for future construction, equipment, etc., at not over $1,500,000 per annum.

The refunding 4s of 1901 (limit of issue $85,000,000) will be immediately secured by deposit of all the Kansas City division bonds, except those reserved for improvements, Kansas City to Bolivar, 147 miles, and deposit of $4,650,000 (all) St. Louis Okla. & So. bonds, Sapulpa, I. T., to Denison, Tex., 197 miles, and upon completion of the refunding begun in 1901 will also be a first lien on the remaining portion of the 1,902 miles owned by the company at the time of the making of the mortgage; meantime they are a blanket lien subject to the underlying bonds. Of the authorized issue, $62,500,000 were issuable to refund existing bonds, the balance being reserved for extensions and improvements. ORGANIZATION.—Organized under laws of Kentucky. In Feb., 1901, the Union Pacific acquired $70,000,000 to $80,000,000 of the capital stock, a strong working control, but the road will continue to be operated independently. V. 72, p. 242, 284. Under plan for readjustment of Central Pacific securities, the Southern Pacific in 1899 acquired the entire capital stock of the Central Pacific. See that company's statement also see below. In July, 1901, it was proposed to expend large amounts in improvements during the next two or three years.—V. 73, p. 33.

In Jan., 1900, Southern Pacific interests acquired control of the Galveston Houston & Northern, Houston to Galveston, 53 miles. In Feb., 1900, substantially all the stock and bonds of the Carson & Colorado were acquired and the road will be broad-gauged and eventually extended as a link in a new line made from Los Angeles, in Southern California, easterly towards Salt Lake, Utah. In Feb., 1900, practically all the stock of the Houston East & West Texas Ry. and Houston & Shreveport RR were acquired.—V. 70, p. 176, 381, 687. In July, 1900, the Ogden & Lucin RR. was incorporated, with $1,000,000 stock, to build the proposed cut-off on the Central Pacific across the Great Salt Lake from Lucin to Ogden, Utah, 107 miles, a saving of 39 miles over the old line. V. 71, p. 5. In Nov., 1900, a majority of the Pacific Mail SS. stock ($10,005,000) was acquired. V. 71, p. 1013, 1312.

PROPRIETARY LINES.—These, with a total mortgage indebtedness June 30 1900, of $319,914,106, are mostly owned—only $1,666,503 out of their total stock of $291,273,572 not being held on July 1, 1900, by the Southern Pacific Co. "OMNIBUS LEASE," see SUP'T of Jan., 1899.

STOCK, ETC.—Total stock authorized, $200,000,000, including $67,275,500 exchanged in 1899 for Central Pacific stock—see Central Pacific and V. 68, p. 378, 725; V. 69, p. 132; V. 70, p. 740.

BONDS.—The fifty-year 4 per cent collateral trust gold bonds authorized by the Southern Pacific Co. in 1899, in connection with its acquisition of the stock of the Central Pacific, are for the total authorized amount of $36,819,000, and are subject to call at par on six months' notice. The first issue of $28,818,500, secured by the $67,274,200 common and $12,000,000 preferred stock of the Central Pacific, was issuable forthwith. The remaining $8,000,000 can be issued from time to time only as an equal amount of Central Pacific preferred is received and added to the collateral, $5,000,000 of this stock being reserved for improvements and additions on the Cent. Pac. at not exceeding $200,000 yearly—see Cent. Pac. and V. 68, p. 378. See Mortgage Abstract, V. 69, p. 859.

The first refunding 4s and 30-year gold 3½s issued by the Central Pacific are unconditionally guaranteed, principal and interest.

The two-five-years collateral trust 4½s of 1900, limited to $30,000,000 (present issue $5,000,000), are secured by deposit of $7,174,000 par value of various bonds and $59,187,000 stocks of companies controlled, including Pacific Mail etc., and $1,530,000 Wells, Fargo & Co stock; other $5,000,000 is issuable against the deposit of additional stocks and bonds of companies controlled or acquired up to 90 per cent of the actual cost thereof. See Mortgage Abstract, V. 71, p. 1314.

On Dec. 10, 1899, a new line was opened from Columbia, S. C., to Savannah, Ga., about 160 miles, of which the Carolina Midland, Perry to Allendale, 52 miles, forms a part, the Co. building from Columbia to Perry, 31 miles, and using Atlantic Coast line and Plant system trackage from Allendale to Savannah, the latter being partly replaced by the construction of its own line from Allendale to Hardeeville, S. C., 50 miles, opened Dec., 1900, V. 71, p. 447. In Oct., 1900, extension from Burgin to Jellico, Ky., 115 miles, and other extensions were proposed, including one from Chattanooga, Tenn., to Stevenson, Ala., about 38 miles, under the charter of the Memphis-Chattanooga RR., for which $3,000,000 bonds were reserved under Mem. & Charleston first mortgage. V. 69, p. 956. The Louisville Evansville & St. Louis Consolidated RR. was taken over after foreclosure on Jan. 1, 1901, and in 1901 a majority of the stock and general mortgage bonds of the Mobile & Ohio were acquired. The contract is so favorable to the city that it is expected to stand indefinitely, though by its terms terminable at the end of a year. THE USE OF CRUDE OIL IN LOCOMOTIVES.

The discovery of the Texas oil fields, with their large supply, brings into greater prominence the advantages incident to the use of crude oil for fuel in locomotives.

The use of liquid fuel in locomotives is by no means new or confined to narrow limits. Where the supply of oil is sufficient, or there is no native supply of wood and coal, there the merits of liquid fuel have been recognized and its use instituted to a greater or less degree. Ten years and more ago, its superiority to coal, weight for weight, had been established. Mr. James Holden, Locomotive Superintendent of the Great Eastern Railway of England, stated in an address before the International Railway Congress, that in the latter part of 1900 the Great Eastern Railway had fifty-eight engines burning liquid fuel, and the Imperial Austrian State Railway had thirty-two oil-burning engines for operating the Arlberg Tunnel Railway. They were also used more or less on the Western Railway of France; Paris, Lyons and Mediterranean Railway, Paris and Orleans Railway; railways in the east adjoining the great oil fields of Borneo and Java, in South Africa, Peru and the Argentine Republic. The Southern Pacific Railroad Company has used fuel oil in locomotive service for several years and is extending its use as the supply of such fuel increases. From tests made in engines of the same size engaged in the same class of service, the following comparative results of coal and California petroleum have been obtained from evaporative tests in locomotive service.

	Petroleum.	*Coal.*
Miles run	224·00	224·00
Weight of cars in train, tons	113·01	110·40
Actual running time, hours	7·55	7·63
Average steam pressure gauge, pounds	133·00	130 00
Pounds of fuel burned	6,040·00	8,043 00
Water evaporated per pound of fuel	9·11	6·19
Pounds fuel to evaporate one pound of water from and at 212 deg. Fahrenheit.	0·09124	0·1349
Equivalent of fuel for equal evaporation, one pound	1 00	1·48
Ditto by measure	168·90 (gals.)	1·00 (ton.)
Miles run per ton	74·14	55 72
Ton miles per pound of fuel	4·191	3 074

From the above data two important facts are apparent: (*a*) the ratio of the evaporation or working qualities of the two fuels, by which, given the local prices of them on board the engine, a decision can be made as to which fuel shall be used, and (*b*) the much greater distance traversed by the oil-burning locomotive with equal weights of fuel. Other railroad tests have shown other important advantages for the liquid fuel. In the year 1892 tests were made in Peru on the Oroya Railway. On this road, where heavy grades were combined with curves, eminently satisfactory results were obtained. The steam gauge stood between 135 140 and was very steady. Up to a 3-per cent grade there was no smoke, and on a 4-per-cent grade there was only occasionally a slight, hazy smoke. Herein is a great advantage over coal. The steam pressure can be kept steady when working hard, since the fuel can be fed regularly and nearly perfect combustion obtained, the combustion per pound of oil being about the same for all rates of combustion. With coal the fuel is added at irregular intervals, and a sharp strong exhaust is liable to tear up the fire and carry away small pieces of coal, sparks and red hot cinders. The latter cause much damage by fire, which the use of oil would eliminate. Absence of smoke makes it desirable in tunnel use. This might assist in the solution of the tunnel problem in one of our largest cities.

No terminal labor is required in cleaning fires and removing ashes. And the large, costly coal pockets would be replaced by the oil tanks from which the tenders could be cheaply filled with oil. In country districts on the Great Eastern Railway the oil is allowed to run by gravity from tank cars into storage tanks, from which it is pumped to the tender by the air-brake pump of the locomotive. These savings would, perhaps, amount to fifty cents per ton of coal consumed. The engine is always ready for service with fires always clean. There need be no trouble with leaks from excessive contraction when oil is temporarily shut off or turned down. On the Oroya Railway after six months of service the fire box showed no signs of leaking or of strains.

If the oil wells in Texas and California shall produce cheap fuel in very great abundance, the saving to the railroads in the southwestern part of our country will be extremely large. With such reduction in operating expenses made possible by the use of crude petroleum, the freight rates will doubtless be lowered and the industries of that region correspondingly benefited.

SAFETY TO EMPLOYES.

Maximum efficiency in service is the result sought by the managers of all works. This is markedly so on railroads, where the most perfect system of operation is demanded to insure the rapid and regular movement of trains without the sacrifice of safety. To secure this maximum efficiency, it is necessary to have superior men, as employes, working under the most advantageous conditions.

One vital factor in securing the best performance of their duties is that the undivided thought and attention must be given to the work in hand by those engaged in the prosecution of the company's business. The nearest approach to this desideratum can be reached only through constant effort on the part of the railway officials and the employes themselves, to see to it that the greatest possible immunity from danger be afforded the traffic movers. Considerable progress has been made in this country looking to the above end, but much remains to be accomplished along the old, as well as new lines. Where improved car-couplers and air-brakes have been adopted, the duties and dangers of the train men have been very greatly lessened. These modern adjuncts should be a part of the equipment of every car. Greater effort should be made to improve the condition of the ground surface in freight yards in order that a good surface shall be presented to the trainmen's feet during the activities attending the shifting of cars. Posts, high switchstands, wires and everything which would interfere and be a source of danger should be rigidly excluded.

The work is also facilitated and rendered safer where the yard is amply lighted at night. The advantage that can thus be gained is being provided for in the new switching and transfer yards of the Chicago Transfer & Clearing Company. The yards are lighted by arc lamps, supplemented by a search-light at the signal tower by which any particular spot can be illuminated. The Lehigh Valley Railroad Company is endeavoring to prevent accident from an entirely different source. It has issued orders to all the train crews that while on duty all conversation, whether social or business, must be in English. This tep was taken after an accident which occurred because a brakeman did not understand an order given by the conductor in the "Pennsylvania Dutch" dialect.

That which ensures the safety of the train employes also makes for the safety of the passengers, facilitates the rapid movement of trains, and contributes to the general harmony of the corps. It is, therefore, expedient that constant study be given by the railroad managements to secure greater safety to employes. The importance of this subject is realized in England, where a law was passed last year for the prevention of accidents to railroad employes. To enable the railroads to carry out this law, the British Board of Trade has issued a code of rules which is to be submitted to the criticism of the railroad companies before its final adoption. The substance of the rules is given below:

1. Within five years wagons (freight cars) must have brake-levers on both sides; after one year from the time the rules go into effect no new or rebuilt wagons shall be used without brake levers on both sides.

2. Labels (car cards), when used, must be made in duplicate, so as to have one on each side of the wagon.

3. After one year cars must not be "propped" (cars on one track pushed, by means of a pole, by an engine on an adjoining track) except in case of absolute necessity arising from accident or other emergency. Also tow-roping (pulling of cars on one track by an engine on an adjacent track) is forbidden, except in cases where there is no other way to deal with the traffic.

4. Within two years all engines and tenders must have power brakes.

5. Stations or sidings where shunting is done after dark must be sufficiently lighted; where necessary the Board of Trade will issue orders on this subject.

6. Rods and wires running to switches and signals must, within two years, be sufficiently covered or otherwise guarded. Ground switch levers must be so placed as to cause as little obstruction as possible to employes.

7. If the Board finds any office or cabin situated too near the track, or in any place to be a source of danger to employes, it may order alterations.

8. Within six months fouling points must be marked; that is to say, where two tracks run within less than six feet of one another, a post or other mark must be set; but the mark must not be placed so as to be a source of danger.

9. Gauge glasses on boilers of both locomotive and stationery engines must within three years be protected by a sufficient guard or covering, and must have a sufficient automatic shut-off valve.

10. Tool-boxes on engines and tenders must be so placed that the men can get at the contents of the boxes while the engine is in motion, without risk. Within three years water gauges must be provided on tenders in such places as to be visible to the men without their incurring undue risk.

11. Trains not having continous brakes must have brake vans.

12. Where important track repair work is going on, where danger is likely to arise, the company must provide persons for the express purpose of maintaining a good lookout for trains.

13. If necessary to avoid interruption of business, the Board may grant an extension of time in respect to these rules.

INCREASED TRAFFIC THROUGH IMPROVED APPLIANCES.

Patrons of railroads are wont to obey the physical law to follow the line of least resistance, and the successful railway is the one that reduces this resistance to a minimum. Other things being equal, passengers will not exert themselves more than possible in reaching their seats, nor will they suffer the car to exert itself on them during transit. By the efforts of railway managers in various ways can be seen the appreciation of the demands in this direction. The efficiency of each new improvement can be noted in the increased traffic accruing. The increase in traffic comes not merely from attracting patrons from other roads, but also in creating patronage which springs up because of the facilities offered.

These facts are strongly emphasized in the railway history of New York City. Ten years ago the Manhattan Railway Company "was carrying by far a larger number of passengers than either what now constitutes the Metropolitan Street Railway system proper or what may be termed the Third Avenue Railroad system, although all of the Third Avenue system is

now controlled by the Metropolitan Company. At that time the Manhattan gross receipts were increasing at the rate of about half a million dollars yearly, and reached their culmination in 1893, when 221,407,000 passengers were carried." At about this time the adoption of electricity by the surface lines attracted travel to them, with the result that the patronage of the Manhattan Railway fell off for the next six years. Since then the crowding of the surface lines has turned traffic to the Manhattan. A continual increase for several years may be expected on this railway as a direct result of the adoption, when it shall be completed, of the improved motive power noted in the STREET RAILWAY SUPPLEMENT for February of this year. With the opening of the rapid transit service there will necessarily be a readjustment of the traffic. In these instances are seen the vacillations of traffic according to the condition of service offered. The same effort to increase traffic through increased facilities is to be seen in the plan of the Boston & Albany Railroad Company to increase the local traffic on that railroad. They have never had a train dispatcher's department, but are planning to establish one in the South Union Station at Boston. By this means they intend to offer such inducements in running time and in frequency of trains that they will get a good share of the travel from points outside of a radius of four or five miles from the station. In Boston, the Boston Elevated Company runs the surface cars up an incline at the Dudley Street Station until they are nearly the same elevation as the elevated cars, to make the change from one to the other with as little inconvenience as possible.

Two improvements of a different character are illustrated by the practice of the Boston & Albany division of the New York Central Railroad Company. They, in common with some other roads, sprinkle the road-bed each year with crude petroleum. This device, by preventing clouds of dust during the passage of the train, adds greatly to the comfort of the passengers and aids in keeping the road-bed in good condition. They have also given much attention to providing a roadway which shall present a beautiful and restful appearance. For several years they have had a landscape gardener whose duty has been to improve the condition of the grounds around the several stations, and in some cases between stations. More attention should be given to the latter by all railroads. Cities need also to realize the fact that their reputations would be greatly increased if they would make the surroundings of the station attractive instead of the opposite, as is so generally the case. The plan which the railroad company has adopted is to plant shrubs, bushes and vines in tasteful and natural ways. Unnatural and incongruous masses and shapes of flowers, glaring arrangements of whitened stones and perplexing faultlessness of symmetry have been studiously avoided. Most of the station buildings, themselves, which are built of granite with brown stone trimmings, present a very pleasing appearance. As one travels along the road a sense of cleanliness, beauty and comfort takes possession of him, until he feels thankful that he selected that route, and resolves thereafter to patronize that line and also to advise his friends to do likewise. Such administration pays. Efforts in the same direction are to be seen on those roads which pay much attention to securing safety, through the block signal system and other methods; comfort, by a superior road-bed, electric lights in cars, free reclining chairs and similar devices and fast train service. The British railroads are giving these details increased attention. The Great Eastern Railway has for some time had a Westinghouse electro-pneumatic installation in one of its London freight yards and the London & Southwestern Railroad has recently installed a low pressure pneumatic interlocking plant at Grateley, the first of its kind on an English railroad. They are also placing automatic block signals.

It is only by offering the greatest possible comfort to the body, delight to the eye and rest to the ear, at reasonable terms, that the most extensive passenger traffic can be secured and maintained.

AERIAL NAVIGATION.

The mysteries and subtleties of aërial navigation have attracted the attention and called forth the efforts of the venturesome for more than a century. In an account published in 1786, Dr. Jeffries describes two voyages made in a balloon by himself and a M. Blanchard. The first voyage was made on the thirtieth of November 1784, from London into the Parish of Stone, in the County of Kent; the second flight was from the cliffs of Dover, England, into the forest of Guines, Province of Artois, France, on January 7 1785. In opening the narrative, Dr. Jeffries says: "After so many accounts of aërial voyages have been laid before the public, some apology on my part for attempting to obtrude the following seems almost indispensable. . . . The success of the first attempt naturally struck every one with surprise. . . . Some of a sanguine disposition were led to expect from it very great acquisitions and improvements in almost every branch of useful science; others of a contrary temper, after joining in the general applause bestowed on the first discoverer, called in question the utility which it might be of, and whether it would serve any other purpose than that of mere amusement." The points which he wished to study were:

"First, the power of ascending or descending at pleasure while suspended and floating in the air.

"Secondly, the effect which oars, or wings, might be made to produce towards this purpose, and in directing the course of the balloon.

"Thirdly, the state and temperature of the atmosphere at different heights from the earth.

"Fourthly, by observing the varying course of the currents of air or winds at certain elevations, to throw some new light on the theory of winds in general. . . .

"After waving our flags and the first parting salutations of our friends were over, M. Blanchard applied himself to his oars, and which (though inadequate to the *government* of the balloon) appeared to me to very materially *influence* the course, ascent and progress of the balloon, and with which we could, by acting with but one oar or wing, always turn round the car and balloon, either wholly or in part, *ad libitum* . . . and during our whole voyage convinced me that with some future improvements (which I do not at present presume to point out) they may be of material service, not only in aiding the ascent or descent of a balloon, but especially in directing its course whenever the wind is not strong."

The problem of aërial locomotion can be approached from two sides—first, to provide an instrument with wings upon which the action of the air will keep the body in place; or, second, to design an apparatus which shall be lighter than the air, and will therefore be supported by it. The latter plan would indeed be desirable, since then one would at least be sure that he could float on the air even as a disabled ship floats on the ocean. But unhappily there are considerations which make this plan impossible. To be supported by the air a body must displace a volume of air which shall at least equal the weight to be supported; hence our machine, under these conditions, must take the form of a balloon. But a balloon of sufficient size to carry any great weight would experience a large resistance to motion through the air, which resistance would increase not less fast than the

square of the velocity of flight. Massive machinery would be required to overcome this resistance at any high speed. Thus, perforce, the balloon, by reason of the great mass required and resistance to motion encountered, is excluded from consideration as a commercial carrier of freight and passengers. The first method, that of wing flight, has ever been a seductive and attractive problem. To have the Air-Line Express from Anywhere to Everywhere at our disposal would be indeed a desideratum.

There are, however, important considerations in connection with the problem which make one at least skeptical. The example which nature gives us of aërial locomotives, birds, furnish conditions which it is impossible to duplicate—muscles which expand and contract, push and pull, as it were, great strength in material of light weight and a light frame work built on graceful lines. The effective shape of the wings has not yet been duplicated, and the ever changing fluid in which they act does not oppose nearly as great resistance as does water to the steamship propeller. But let us suppose that the airship is successfully built so that it can carry freight and passengers from shore to shore. There are yet two practical difficulties in the way. Our ship is sailing along some day when a not uncommon event happens, the machinery breaks and engines stop. What fate awaits us now! On the ocean the ship floats until the damage is repaired; but in the case of our "Airship Express," it must, perforce, suffer. In other words, the descent would be as unquestionable as in the experiment being conducted by learned inventors who "drop a cat from a height of three or four hundred feet on to a pillow, taking photographs of him at each stage of the process by which he accomplishes the well known feline feat of always landing on his paws," only our airship investigators would be likely neither to light on their feet nor to find the pillow. In the second place, it seems highly improbable that the traffic could be conducted at a figure which would be at all commensurate with present methods.

From the difficulties already referred to, for the overcoming of which no satisfactory solution has been found in the past over one hundred years, we are indeed led to query with those of Dr. Jeffries's day as to the "utility which it might be of, and whether it would serve any other purpose than that of mere amusement (or some special purpose)."

TECHNICAL MEN IN THE BUSINESS WORLD.

The question is often asked, "What becomes of all the graduates that our technical schools send forth each year? There surely cannot be occupation for them all." The answer to this question is, "Look for fully fifty per cent of them in the business world." If one concerns himself with the graduates of twenty or more years, he will find a far greater percentage in that sphere.

At the present day, while there are yet a few who belittle the technically educated man, the demand in business circles for broadly prepared men is constantly increasing. The tendency is illustrated in the case of the son of a steel manufacturer. This young man received a most thorough and extensive technical education. He then went to work as a laborer in the paternal establishment, where in a comparatively short time he was able to master the commercial and constructive details of the work in a manner which would have been impossible, even after years of apprenticeship, by one not posted in the theory upon which the practice was founded. It is at exactly this point that the essential, fundamental condition for the future successful man is seen. He must be a man with a keen, well-balanced intellect, who has a broad, intensive theoretical training, supplemented and amplified by a thorough knowledge of the details of his business gained by close and progressive contact therewith from the bottom to the top.

That the demand for technical men has been increasing rapidly is witnessed by the inception and remarkable growth within recent years of engineering schools. These institutions have greatly increased their instruction forces and enlarged their laboratory equipments, making it possible to offer greater diversity and efficiency of instruction. Those engaged in commercial and financial affairs also begin to realize that some particular preparation is necessary. When the business world makes a just demand, the educational world is quick to endeavor to supply that demand; yes, it strives to anticipate and be forehanded in furnishing the supply before it is realized by others that the need exists. Efforts to give the commercial and financial men a suitable training are seen in the establishment of the Tuck School of Administration and Finance at Dartmouth College and courses in commerce and kindred subjects at many other institutions. Many corporations are taking graduates and putting them to learning the business, as for instance, one railroad company in the northwestern part of the United States. They engaged two technical students to work as section hands and thus get a working knowledge of railroad construction and maintenance. This method of procedure involves mutual responsibilities and requirements. The young man must have courage, push and stick-to itiveness. He must have a whole-hearted liking for his chosen work and be willing to work hard to learn the varying steps. The employer, too, needs to exercise great caution and judgment. He should remember that the properly educated man comprehends principles and methods more quickly than the uneducated man, and see to it that the apprentice is not kept on particular work longer than is necessary to understand it. It is essential for the successful working of this plan that the young man be advanced as rapidly as possible, since he has already devoted much time and money to his technical education.

Several companies have also sought to raise the personnel of their corps by furnishing chances for suitable studies and amusements for their employes and families. Such provision has been made for some time by the Northern Railroad of France. In 1882 the directors of that railroad founded a free school having a three-years' course for the exclusive use of the sons of their employes. Entrance examinations for children between thirteen and fifteen years of age are held each year under the direction of the Chief Engineer. The subjects taught are: "The French language, geography, arithmetic, geometry, physics, chemistry, materials used in the construction of engines, the various parts of engines, and drawing. The pupils also have a practical training in handling tools, in all the processes of the forge and smith's shop, and in the construction of the parts of a locomotive." Those who receive a certificate from the school are given employment by the railroad company upon application.

We must carefully guard and perfect our educational system to preserve and perpetuate our honorable standing as a nation. A London paper said some time since: "The American is successful because he treats business as a science and follows it with the enthusiasm of a scientific devotee."

V. 70, p. 279, 739. Payment of one of the notes for $2,940,635 held by the Government was anticipated in Feb., 1900, and a second in Feb., 1901, in each instance releasing an equal amount of 4s deposited as collateral, which were sold; in Mar., 1901, $1,496,090 was paid on account of a third note due Aug., 1902.—V. 70, p. 429, 480; V. 72, p. 437; V. 73. p. 82,

The mortgage covers the entire property of the company, real and personal, at the time the deed was made, and all additional property and mileage acquired with the proceeds of the bonds. See full abstract of mortgage in V. 54, p. 644; also V. 54, p. 642; V. 55, p. 335. The *Louisville & Jeffersonville Bridge* bonds, of which $3,000,000 are outstanding, are guaranteed jointly and severally by the Chesapeake & Ohio and Cleveland Cincinnati Chicago & St. Louis; any deficit on account of the bridge is payable by them in the proportion of one-third and two-thirds respectively—see V. 60, p. 130; V. 61, p. 327, 559; V. 62, p. 84 and separate statement for L. & J. ORGANIZATION—This *railway* company was organized in April, 1900, and purchased substantially all the stock of the Chicago & Alton *Railroad* Company, viz., $18,322,400 of the $18,751,100 common and $3,472,200 of the $3,479,500 preferred stock, all of which has been deposited as security under the first lien mortgage of 1900; also the line of the St. Louis Peoria & Northern between Springfield and Grove, 57 miles. The *railroad*, whose separate existence is maintained for legal reasons, has been leased for 99 years from April, 1900, the rental being the net earnings, after payment by the lessee of all interest on bonds, taxes and other charges, etc. (See V. 70, p. 686, 995.)

STOCK.—Authorized, $20,000,000 each of common and 4 per cent non-cum. preferred; issued in amounts as shown in table above, the unissued stock being reserved to exchange for the outstanding stock of the *railroad* company not now owned.

DIVIDENDS.—First semi-annual dividend on preferred, 2 p. c., paid Jan. 10, 1901; July, 2 p. c.

BONDS.—The first lien 3½s of 1900 are secured by practically the entire capital stock of the C. & A. *Railroad*, as shown above, and by a direct first lien on Springfield to Grove, 57 miles.—V. 70, p. 894, 944. (See application to list in full in V. 71, p. 1021.)

The *railroad* mortgage securing the 3 per cents of 1899 will refund bonds marked "¶" in table maturing during next four years and also provide fund for improvements and extensions. Bonds in excess of $40,000,000 may be issued thereunder on vote of three-quarters of stockholders for extensions of not over 500 miles, main track, at not exceeding $20,000 per mile, to fund leased line rental obligations and for future betterments not to exceed $5,000,000 at not over $1,000,000 per annum from Jan. 1, 1900. Stockholders in 1899-00 purchased $31,988,000 of the new 3 p. c. bonds at the rate of $650 cash for each $1,000 face value; V. 70, p. 739. See official circular in V. 69, p. 178; also p. 26, 129, 541; V. 70, p. 429, 995; V. 72, p. 183.

ORGANIZATION, &C. This was a consolidation in July, 1875, of the Chicago Burlington & Quincy in Illinois and the Burlington & Missouri River in Iowa. Chicago Burlington & Northern and other subsidiary lines in Illinois were absorbed in May, 1899. V. 68, p. 975. In Dec., 1889, acquired Chicago Ft. Madison & Des M. RR. V. 70, p. 75. In June, 1900, control of the Kansas City & Omaha was acquired. V. 71, p. 134. Stockholders voted Nov. 7, 1900, to purchase the remaining leased lines in Iowa and Missouri held under lease, viz.: Kans. C. St. Jos. & Co. Bluffs, St. L. K. & N. W., Chic. Burl. & K. C., Han. & St. Jos., Keokuk & West. and Chic. Ft. Mad. & Des Moines, Burlington & Missouri River, etc.—V. 71, p. 697, 863, 963; V. 73, p 137.

In July, 1901, $107,577,200 of the $111,200,000 stock had been exchanged for the joint 20-year 4 p. c. bonds of the Gt. Northern and Northern Pac. secured by the deposit of the stock in trust, on the basis of $200 in bonds for each $100 stock, or an equivalent of a guaranty of 8 per cent on the stock. See circular, V. 72, p. 871, and application to list, V. 73, p. 294, and description of bonds under Great Northern.

A branch from Alliance, Neb., to Guernsey, Wyoming, and from Brush, Col., north to a junction therewith at Northport, Neb., about 150 miles, was opened Sept., 1900, of which 23 miles is Union Pacific trackage. V. 71, p. 437. Extension from Toluca, Mont., to Cody City, Wyoming, 120 miles, is under construction, of which about 101 miles were operated in Sept., 1901. In Mar., 1901, the Davenport Rock Island & Northwestern Ry., Moline, Ill., to Clinton, Ia., 40 miles, was acquired jointly with the Chic. Milw. & St. Paul Ry.—V. 72, p. 532, 675.

CAPITAL STOCK.—The stock has been increased for the acquisition of new lines, retirement of over $15,000,000 convertible debentures, etc.; in 1880 a 20 p.c. distribution was made. See "Organization" above.

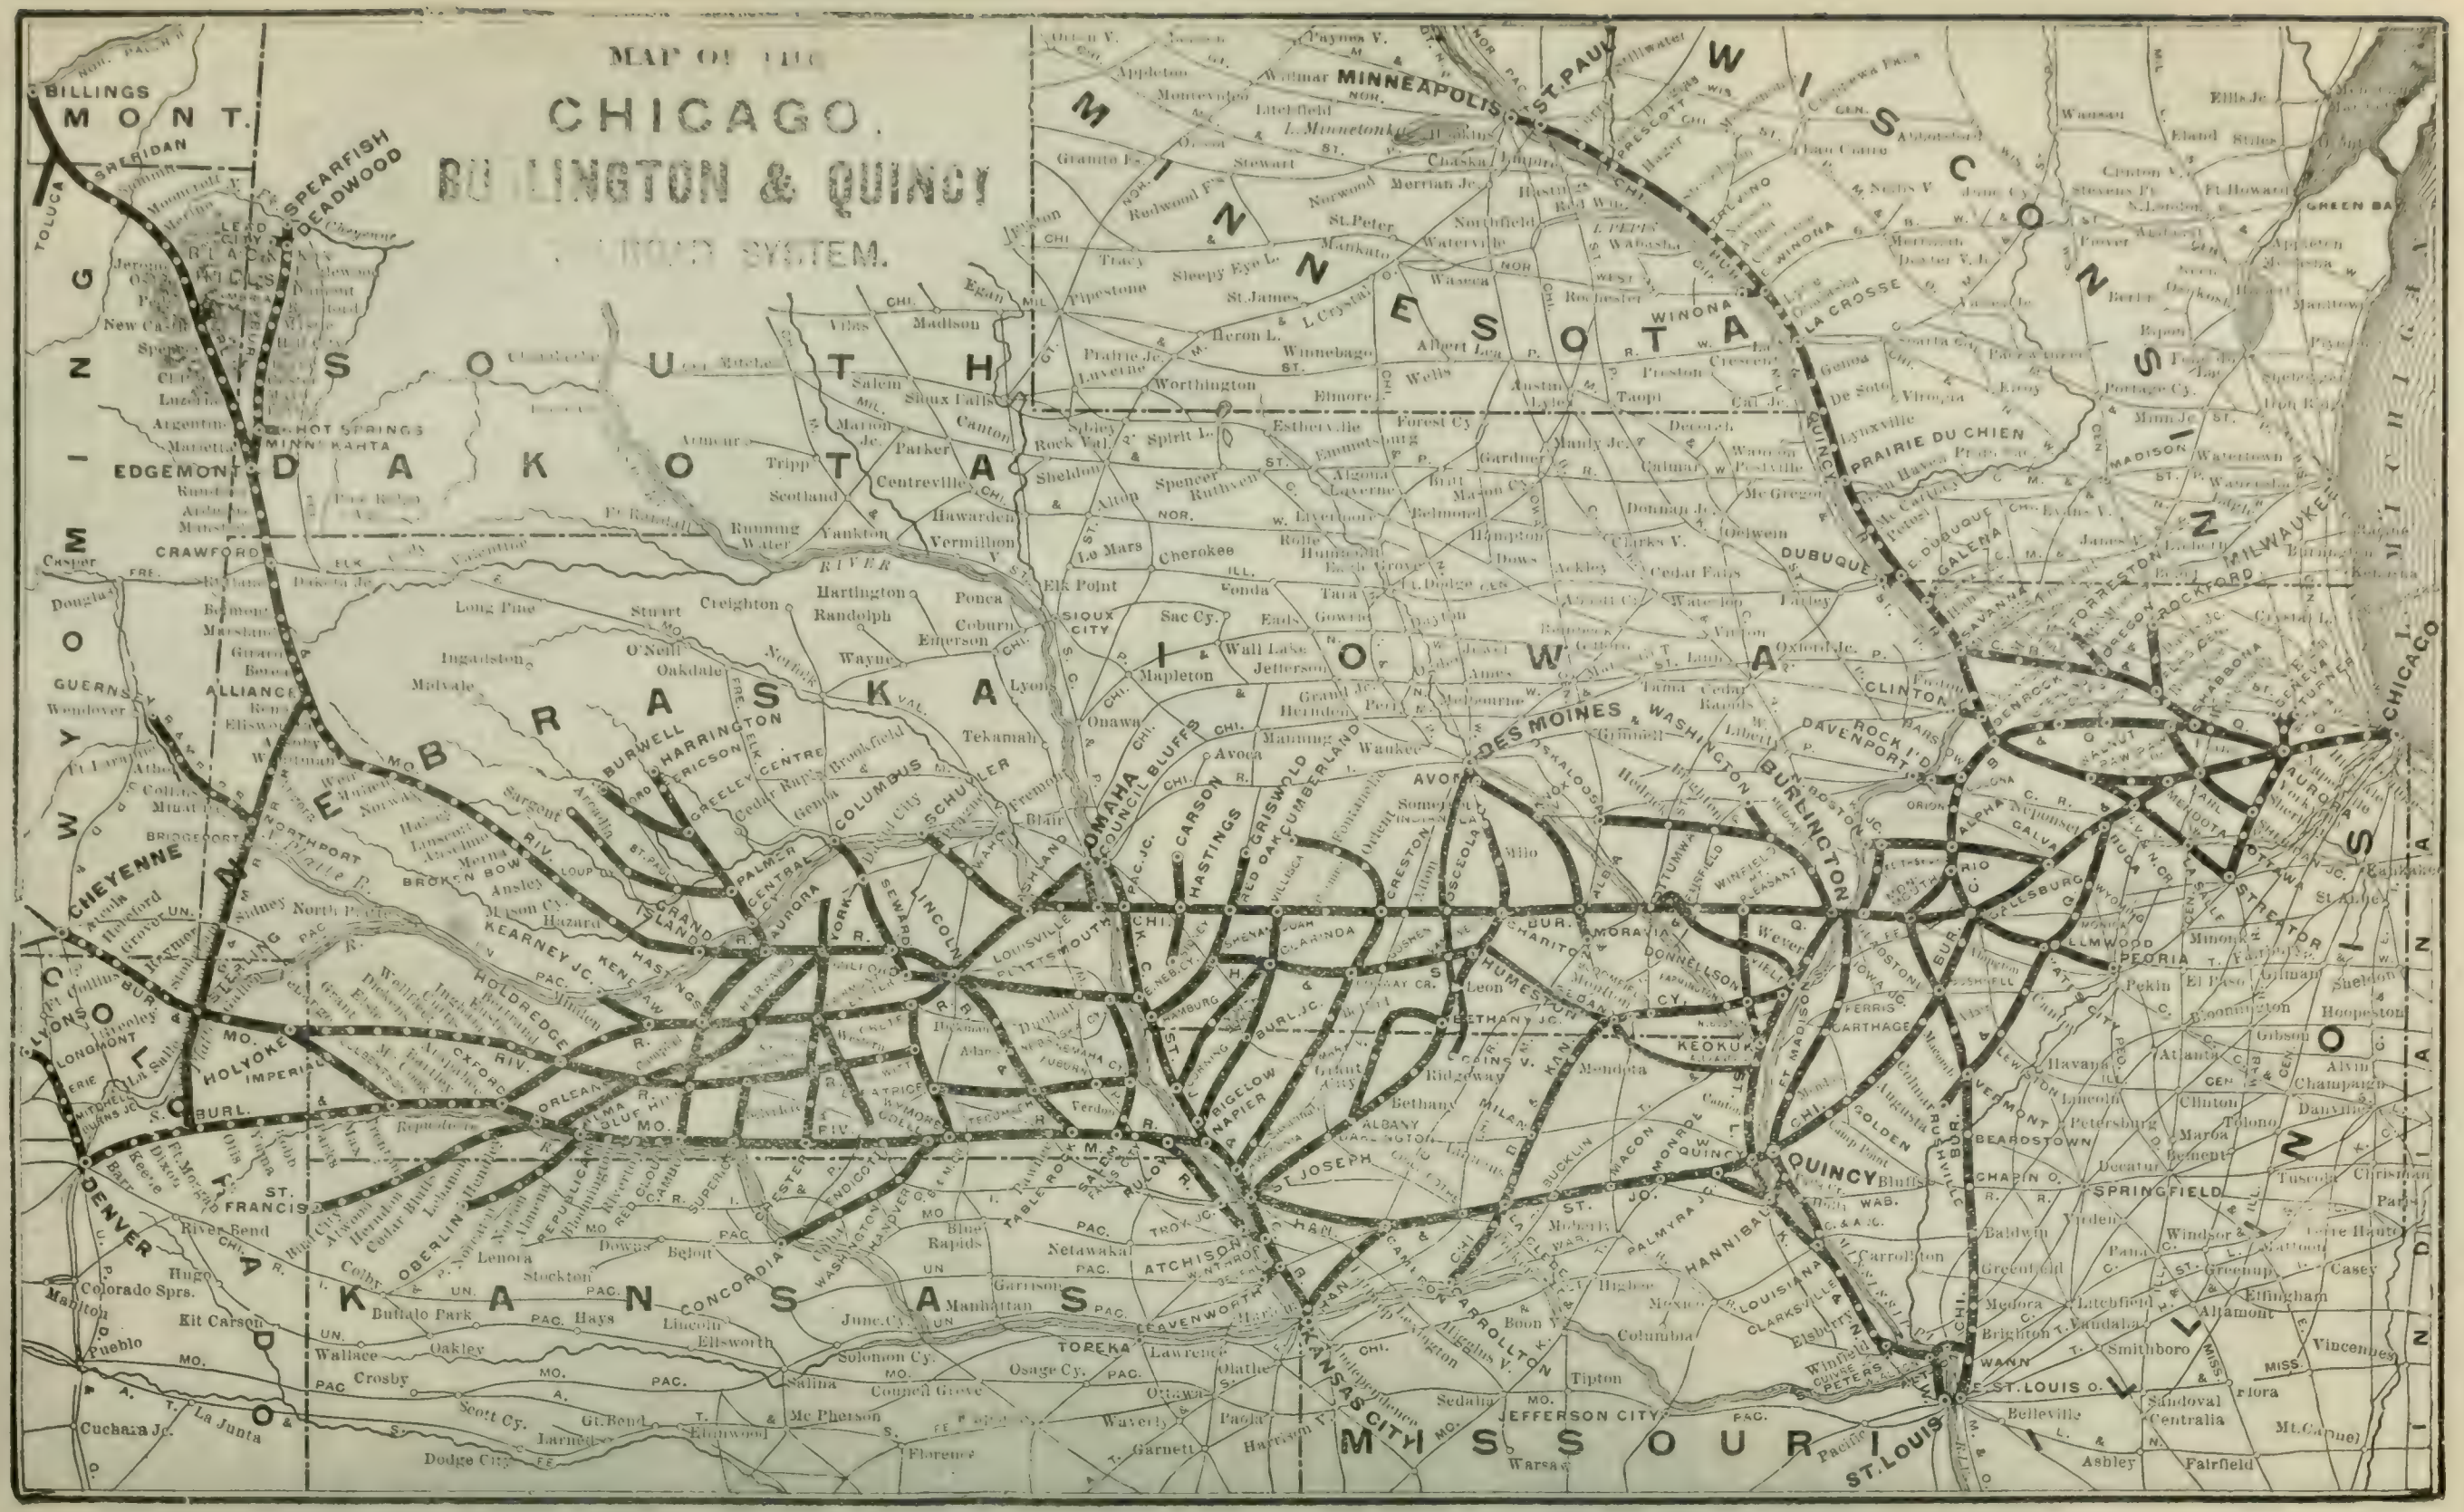
SINKING FUNDS.—Included in the bonds outstanding in the table above are sundry bonds of the company which are held alive and drawing interest for account of the various sinking funds.

BONDS.—For full description of each loan see the editorial article on pages 3 to 6 of SUPPLEMENT of Oct., 1896, and CHRONICLE V. 63, p. 775.

The *mortgage of 1899 for $85,000,000* secures bonds dated July 1, 1899, maturing July 1, 1949, and to bear interest at not to exceed 5 per cent. Such bonds as may be issued bearing 3½ per cent interest will be subject to call at 105 per cent and accrued interest and those bearing interest at less than 3 p. c. at par and interest on any coupon day after thirty years. The issue is limited to $85,000,000, and the lien securing the bonds will become an absolute first mortgage, covering all lines east of the Mississippi River, upon the payment of $28,924,000 consolidated mortgage 7 per cent bonds due July 1, 1903, and of $2,320,000 Chicago & Iowa Division 5 per cent bonds due Feb. 1, 1905. Sufficient of the new loan is reserved to take up these $31,244,000 bonds and $23,238,000 were issued in 1899-1900, as below stated. The remainder of the loan will be available for additions, etc.—See V. 68, p. 771; *abstract*, V. 69, p. 283; V. 69, p. 795.

The *Iowa Division* bonds are a first mortgage on the main line in Iowa from Burlington to East Plattsmouth on the Mo. River, 278 miles, and on 122 miles of branches; they are also a first collateral lien on 420 miles of branches and 86 miles of second track. These bonds have a sinking fund of 1½ per cent ($203,800) yearly, for which the 4s are subject to call at 100, the 5s at 105. The single main line and branches covered "shall not exceed in the aggregate 900 miles," at $16,000 per mile; on second track (of which June 30, 1901, there were 86 miles) may be issued an additional $14,000 per mile. (V. 65, p. 462.)



Denver Ext. bonds can be increased only for 2nd track at $10,000 p. m.

The collateral trust *Nebraska extension* bonds of 1887 are issued at $20,000 per mile for single and $10.000 per mile for second track on not exceeding 1,500 miles. **Abstract** of deed V. 45, p. 441.

Burlington & Missouri RR. in Nebraska consol. mortgage of 1878 is for $14,000,000, and is now a 1st M. or 1st collateral lien; all except the $5,000,000 of *exempt* bonds are subject to call for the sinking fund at par, $278,600 having been retired in 1900. The "exempt" bonds may be called after 1908.

The 5 *per cent debentures* of 1890-92 are *convertible* $ for $ nto stock any time prior to Dec. 1, 1902, except when books are closed. $15,543,200 had been thus converted up to Oct., 1901. V. 67, p. 842. See terms of conversion on page 5 of the SUPPLEMENT for Oct., 1896.

The Chicago Burlington & Quincy sinking funds for the several loans respectively held alive June 30, 1901, of the bonds given above as outstanding: Of g, $5,300,600 July 1, 1901; h, June 30, 1901, $1,931,000; k, $386,400 July 1, 1901.

branches tributary to the main line were built into choice agricultural territory. Corn, however, being one of the principal articles carried by it, its earnings vary greatly according to the size of the crop.

In April, 1899, stockholders subscribed for $16,166,000 new 3½ per cent bonds at 75 and $4,041,500 stock at par.

The company's sinking funds have received to June 30, 1901 over $20,574,000. With this money about $8,500,000 of the company's bonds have been canceled, while the remainder of the cash not so used has been invested for the benefit of the several sinking fund loans in bonds that are held alive drawing interest and are therefore included in the company's outstanding debt. In 1900-1 the aggregate sinking fund income was $1,223,579, of which $448,600 is the amount carried direct to the sinking fund and the balance appears in the accounts merely as part interest on funded debt.

The road unbonded and the roads whose bonds were all owned on June 30, 1901 (V. 63, p. 775), were:

HISTORY, LEASES, &C.—Reorganized under existing title in 1877. In Nov., 1887, consolidated with two other co's (V. 46, p. 135), and on June 6, 1894, with Chicago & Indiana Coal RR. V. 58, p. 987; also V. 48, p. 334. Also owns $1,000,000 stock of Chic. & Western Indiana—having all the local traffic of the latter road from Dolton into Chicago. In 1901 the traffic contract made in 1890 with the Evansville & Terre Haute for the operation of a through line between Chicago and Evansville was still in force. (V. 55, p. 995.) In Mar., '97, the Chic. Paducah & Memphis, 100 miles, was purchased. In Dec., 1899, merged the controlled companies, the Evansville Terre Haute & Chicago and the Indiana Block Coal RR. V. 71, p. 389. An extension from Marion, Ill., to Thebes, 63 miles, connecting with the St. Louis Southwestern, was completed in Jan., 1900. V. 68, p. 231; V. 68, p. 771. Extension to Joppa, Ill., 16 miles, completed Dec., 1900.—V. 73, p. 660. A 22-mile branch from near Cissna Jct. eastward to Brazil division is proposed, of which 11 miles under construction.

In Dec., 1900, the Southern Ill. & Missouri Bridge Co. was incorporated in the interest of the C. & E. Ill. to build a bridge across the Mississippi River, at or near Thebes, at an estimated cost of $1,500,000 or $2,000,000, connecting with St. Louis Southwestern a direct line to Texas points.—V. 71, p. 1219.

CAPITAL STOCK.—The common stock ($15,000,000 authorized) is entitled to all surplus after 6 per cent on the preferred stock. In addition to the amounts outstanding in the table, $4,847,000 common and $865,900 preferred were held in the company's treasury in July, 1901.

BONDS.—The *general consol. and 1st* mortgage of 1887 (trustee, Central Trust Co.) provides for the retirement of $6,042,000 prior bonds and for issue of bonds on new road at $18,000 per mile for single track also for bonds for equipment at $7,000 per mile and for double track at $8,000 per mile. In 1897 the total issue of gen. consol. bonds was limited to $30,000,000 and bonds were reserved for Chicago & Indiana Coal firsts. See V. 64, p. 1088. The gen. consols are a *first* mortgage on 380 miles of road, including the line from Rossville via Sidell to Thebes, etc.; also on equipment valued at $2,657,000, and upon real estate in Chicago costing over $1,200,000. They also cover 106 miles of double track from Danville to Dolton, Ill., and rest of property subject to prior liens.

GENERAL FINANCES.—This company owns most of the capital stock of the Brazil Block Coal Co., and carries all its coal. It carries also the coal of the Danville, Clinton and Williamson county fields. On July 1, 1901, Chicago P. & M. car trust notes (including interest), $155,548. In Jan., 1901, $1,000,000 each of common and preferred were issued for equipment, improvements, etc.—V. 72, p. 86.

created, but only with consent of two-thirds of both classes. The several classes in case of liquidation will have principal paid in gold, according to their priority right to dividends. At extraordinary general meetings of holders of debenture stock and preferred A stock collectively, holders of *one-tenth* of said stocks outstanding, present or represented, constitute a quorum and by a majority vote have power to sanction any modification of the rights of said stocks. The provisions of the several classes of stock were fully set forth in the editorial article of the Supplement for October, 1897; see also V. 71, p. 441.

In 1898 the authorized issue of 4 p. c. debenture stock was increased from $15,000,000 to $30,000,000 for future refunding and improvements. See General Finances below.—V. 66, p. 133, 663, 1088.

Finances.—The deb. and pref. "A" stockholders voted Jan. 30, 1899, to issue $8,000,000 debenture stock, in order to refund the Ch. St. P. & K. C. priority loan (the only mortgage debt), which was paid Jan. 1, 1900, and then outstanding lease warrants and sterling notes; of this stock there remained unissued March, 1901, $2,150,000, to provide for paying sterling notes and lease warrants maturing, additions and improvements. Early in 1901 the company was issuing an additional $2,500,000 of 4 per cent debenture stock for capital expenditures in 1901, car trusts, etc.—V. 72, p. 580, 935, 1279. By improvements of the permanent way, etc., operating expenses were reduced in 1900-1901 to 68·38 per cent of earnings, against 66·81 per cent in 1899-0; 70·13 in 1897-8 and 77·47 in 1894-5.—V. 71, p. 441.

Early in 1901 Vermilye & Co. became the fiscal agents of the company, their Mr. Read entering the directory. See V. 72, p. 580.

Chicago Milwaukee & St. Paul Ry.—*(See Map.)*—Operates from Chicago westerly to St. Paul, Minneapolis and Lake Superior, Omaha, Neb., and Kansas, City, Mo., with lines, traversing Illinois, Iowa, Missouri, Michigan, Wisconsin, Minnesota and the Dakotas, viz.:

HISTORY, &c.—The Milwaukee & St. Paul RR. Co. was organized May 5, 1863, and on Feb. 11, 1874, took its present name. The system has since been greatly extended by the construction and acquisition of other lines. The sale of the Milwaukee & Northern to the St. Paul was ratified in September, 1893. In Mar., 1901, the entire stock of the Davenport Rock Island & Northwestern Ry., Moline, Ill., to Clinton, Iowa, 40 miles, was acquired jointly with the Chic. Burl. & Quincy RR., and the road will be used as part of a cut off to be built in 1901 from Davenport to Ottumwa, 119 miles, between Chicago & Kansas City. V. 72, p. 437, 532, 675; V. 73, p. 562.

CAPITAL STOCKS.—The preferred stock has a prior right over the common stock to a dividend of not over 7 per cent from net earnings in each year, but if not earned it has no cumulative right. After payment of 7 per cent on preferred and 7 on common, both classes share *pro rata*. Common stock raised to $55,821,800, by stockholders subscribing at par to 10 per cent increase, ($8,673,200) in April, 1901. See GENERAL FINANCES below. V. 72, p. 437. Preferred stock on Dec. 31, 1873, was $12,274,483; it has been increased to present figures almost entirely by exchange of convertible bonds for stock, only about $9,000,000 having been issued for other purposes (improvements, etc.) In July, 1901, $6,494,000 prior lien bonds outstanding were exchangeable for preferred.

BONDS.—Abstracts of some of the older mortgages were published in the CHRONICLE, V. 45, pp. 85, 114, 144, 212, and V. 48, p. 830.

The following bonds are *convertible into preferred stock* at any time within ten days after a dividend shall have been declared and become payable on the preferred: Iowa & Dakota Extension 7s, River Division 7s, Chicago & Milwaukee 7s of 1903, Hasting & Dakota 7s of 1903 and Ch. Mil. & St. P. consols of 1875. The consols of 1874 also are convertible into preferred within 15 days after dividend day. The convertible bonds were fully described in SUPPLEMENT for Mar. '93, p. 2.

Terminal five per cent bonds of 1884 cover terminal property of several hundred acres in Chicago and Milwaukee.

The *general mortgage* of 1889 (see **abstract** in V. 48, p. 830) is for $150,000,000, to the United States Trust Co., of New York, as trustee, and covers the entire railway property and franchises of the company (therein described) subject to prior liens as below mentioned. The prior lien bonds cannot be extended, but will be paid off at maturity.

The *Fremont Elkhorn & Missouri Valley* consols have a first lien on 1,170 miles (Fremont, Neb., to Deadwood, D. T., 557 miles, and branches to Hastings, Albion, &c., 613 miles), but besides the amount of issue given as outstanding in the table $10,675,000 are held as part collateral for Chicago & Northwestern extension bonds of 1886. The Northwestern assumed $3,600,000 of the Fremont Elkhorn & Missouri Valley bonds and guarantees the rest. See guaranty V. 56, p. 650.
